Citation and/or comment:

**Researcher’s answer to this question was “b.”** For example, The INIM, although it is a decentralized entity, does not appear between the entities budgeted. See [www.hacienda.gob.ni/hacienda/libros.jsp](http://www.hacienda.gob.ni/hacienda/libros.jsp)

**Peer Reviewer ONE Comment:** A more appropriate response to this question would be “a.” INIM (Instituto Nicaraguense de la Mujer) does appear in the link provided above or through the following link: [http://www.consultaciudadana.gob.ni/cciuadana/CD2005/INIM2005.pdf](http://www.consultaciudadana.gob.ni/cciuadana/CD2005/INIM2005.pdf) as well as the others “entes descentralizados.” This information appears since pages 433 of the PGR 2005 but unfortunately, I don’t have access to the budget’s proposal printed version to verify the correspondent pages in that document (following the researchers’ assumption that both, proposal and enacted documents, are similar).

**Peer Reviewer TWO Comment:**

**IBP Comment:** IBP editors chose answer “a” to maintain consistency with the criteria used for selecting answers across countries.
2. Does the executive’s budget or any supporting budget documentation present expenditures for the budget year that are classified by functional classification?
   a. All expenditures are classified by functional classification, and the categorization is compatible with international standards.
   b. All expenditures are classified by functional classification, but the categorization is not compatible with international standards.
   c. Some, but not all, expenditures are classified by function.
   d. No expenditures classified by function are presented.
   e. Not applicable/other (please comment).

   Citation and/or comment: Since the Budget of 2005, the Government has introduced the functional classification. See:
   http://www.hacienda.gob.ni/hacienda/CD2005/Estruct_func_gto1.pdf. In the General Budget of the Republic (PGR) 2006, there is a higher level of detail. See:

   Peer Reviewer ONE Comment: If PGR 2006 was also used and cited should it be included in Table 1?

   Peer Reviewer TWO Comment:

3. Does the executive’s budget or any supporting budget documentation present expenditures for the budget year that are classified by economic classification?
   a. All expenditures are classified by economic classification, and the categorization is compatible with international standards.
   b. All expenditures are classified by economic classification, but the categorization is not compatible with international standards.
   c. Some, but not all, expenditures are classified by economic classification.
   d. No expenditures classified by economic classification are presented.
   e. Not applicable/other (please comment).

   Citation and/or comment: Since 2005, the economic classification of the expenditure is included in the annexes

   Peer Reviewer ONE Comment: Same comment as #2.

   Peer Reviewer TWO Comment:
4. Does the executive’s budget or any supporting budget documentation present expenditures for individual programs for the budget year?

   a. Program-level data are presented for all expenditures.
   b. Program-level data are presented for at least two-thirds of, but not all, expenditures.
   c. Program-level data are presented, but for less than two-thirds of expenditures.
   d. No program-level data are presented.
   e. Not applicable/other (please comment).

   Citation and/or comment: However, the programs included are too broad and there is not much detail on them. The information by program is more detailed only for the Executive Branch and not for the other entities and autonomous organisms. See: [http://www.hacienda.gob.ni/hacienda/CD2005/Presup_Gtos.pdf](http://www.hacienda.gob.ni/hacienda/CD2005/Presup_Gtos.pdf)

   **Peer Reviewer ONE Comment:** The link provided is not the most appropriate. Information by individual programs is presented in [http://www.consultaciudadana.gob.ni/cciudadana/CD2005/index.html](http://www.consultaciudadana.gob.ni/cciudadana/CD2005/index.html)

   **Peer Reviewer TWO Comment:**
5. In the executive’s budget or any supporting budget documentation, are estimates of the aggregate level of expenditure presented for a multi-year period (at least two years beyond the budget year)?

   a. Yes, multi-year estimates of aggregate expenditure are presented.
   b. No, multi-year estimates of aggregate expenditure are not presented.
   c. Not applicable/other (please comment).

Citation and/or comment: In 2005, only the multi-year estimation of the Program of Public Investments is presented. It is not presented for the rest of the budget. It was only in August 2005, when the law 550 was enacted [See: Government of Nicaragua, La Gaceta, Year CIX, No.167, Monday /08/2905. Page 5764, Arto.37], that incorporates in the art. 37 the inclusion of the Medium Term Budget Framework. It should enclose budget estimations of –at least- two forthcoming years. For 2006, it was included a Medium Term Strategic Framework that includes expenditure estimations of some institutions as a pilot experience. See:  
   [http://www.hacienda.gob.ni/hacienda/presupuesto2006/mpmp1.jsp](http://www.hacienda.gob.ni/hacienda/presupuesto2006/mpmp1.jsp), page 60

Peer Reviewer ONE Comment: 2005 PGR includes estimates 2005-2007  
[http://www.hacienda.gob.ni/hacienda/CD2005/Proyecc_Plurianual.pdf](http://www.hacienda.gob.ni/hacienda/CD2005/Proyecc_Plurianual.pdf) but only for Programa de Inversiones Publicas. Would that be enough for response “a”? The following note was added in the comment section above: “(or August?)”

It could be useful to specify the law 550: “Ley de Administracion Financiera y Regimen Presupuestario” or provide link to La Gaceta (specially because others are not necessarily familiar with Nicaragua’s newspapers):

7. Does the executive’s budget or any supporting budget documentation identify the different sources of tax revenue (such as income tax or VAT) for the budget year?

   a. All sources of tax revenue are identified individually.
   b. Sources of tax revenue amounting to at least two-thirds of, but not all, tax revenues are identified individually.
   c. Sources of tax revenue amounting to less than two-thirds of all tax revenues are identified individually.
   d. No sources of tax revenue are identified individually.
   e. Not applicable/other (please comment).

   **Citation and/or comment:** The General Budget of the Republic (PGR) includes an income budget that reflects most of the tax revenue. However, in the last years, it has been denounced that there is an underestimation of the revenues as a mean of diminishing the budgetary transfers to some institutions -as Universities or the Supreme Court- that are proportionally determined according to the Political Constitution. See: [http://www.hacienda.gob.ni/hacienda/CD2005/ruadroingresos.pdf](http://www.hacienda.gob.ni/hacienda/CD2005/ruadroingresos.pdf). This underestimation has been denounced and proved by independent economists showing that in some years (2004) it has been more than 10% of tax revenues. See, as an example, Acevedo, Adolfo: [http://www.ccer.org.ni/documentos/041204_pgr_2005.pdf](http://www.ccer.org.ni/documentos/041204_pgr_2005.pdf)

   **Peer Reviewer ONE Comment:**

   **Peer Reviewer TWO Comment:**
8. Does the executive’s budget or any supporting budget documentation identify the different sources of non-tax revenue (such as grants, property income, and sales of goods and services) for the budget year?

   a. All sources of non-tax revenue are identified individually.
   b. Sources of non-tax revenue amounting to at least two-thirds of, but not all, non-tax revenues are identified individually.
   c. Sources of non-tax revenues amounting to less than two-thirds of all non-tax revenue are identified individually.
   d. No sources of non-tax revenues are identified individually.
   e. Not applicable/other (please comment).

Citation and/or comment:

**Researcher’s answer to this question was “b.”** In general, the sources coming from grants or loans are clearly registered –that represent around 30% of incomes-, the earmarked incomes (as fee for public services) are mostly registered but that is not the case of the property sale or rent revenue. The current transfers of autonomous entities and public enterprises are registered, but in different moments is has been pointed out that it is not registered the totality of the revenues.

**Peer Reviewer ONE Comment:** A more appropriate response to this question would be “a”

**Peer Reviewer TWO Comment:**

**IBP Comment:** IBP editors chose answer “b” to maintain consistency with the criteria used for selecting answers across countries.
9. In the executive’s budget or any supporting budget documentation, are estimates of the aggregate level of revenue presented for a multi-year period (at least two years beyond the budget year)?

   a. Yes, multi-year estimates of aggregate revenue are presented.
   b. No, multi-year estimates of aggregate revenue are not presented.
   c. Not applicable/other (please comment).

Citation and/or comment: Multi-year estimates have not been presented up to now. With the Law 550 on Financial Administration enacted in 2005, it is included the requirement of incorporating the Medium Term Strategic Framework. Therefore, this will have to change but as of yet it has not entered in force and it is estimated that will enter until budgetary exercise 2008.

In the budget proposal and General Budget of the Republic (PGR) 2006 it has been included a medium term strategic framework, but it was not reviewed by the Assembly. According to independent economists, these projections show differences with the reality undervaluing the increase of the fiscal incomes in relation to previous periods. To see, for example, Acevedo, Adolfo: http://www.ccer.org.ni/documentos/041204_pgr_2005.pdf

Again, the estimate of fiscal incomes with the IMF differs with the one from the Budget. This has been recognized recently by the Vice-minister of Finance in an interview to the local media [ see “Reducirán el Estado, Entrevista a Juan Sebastián Chamorro en El Nuevo Diario del 26 de febrero 2006.” http://www.elnuevodiario.com.ni/2006/02/26/nacionales/13635].

To this the fact is added that the estimations that are agreed with the IMF in the signature of the Memoranda of understanding the REAL numbers are registered and not those that are presented in the General Budget of the Republic (PGR) to the National Assembly.

Peer Reviewer ONE Comment: This comment is clearer and provide more specific information than the others regarding Ley 550. Refer to this comment in all the related questions could be useful and more practical.

Peer Reviewer TWO Comment:
10. In the executive’s budget or any supporting budget documentation, is more detail than just the aggregate level presented for revenue estimates that cover a multi-year period (for at least two years beyond the budget year)?

   a. Yes, multi-year revenue estimates are presented for individual sources of revenue, and by revenue classification (such as tax and non-tax).
   b. Yes, multi-year estimates are presented by revenue classification (such as tax and non-tax), but only for some individual sources of revenue.
   c. Yes, multi-year estimates are presented, but only for some individual sources of revenue.
   d. No, multi-year estimates are presented for aggregate revenue only, or they are not presented at all.
   e. Not applicable/other (please comment).

Citation and/or comment: In 2005, no multi-year estimation was presented. In 2006, some estimates are presented, but these have been questioned of being based on undervalued figures. Additionally, these only appear in an aggregate level. See: [http://www.hacienda.gob.ni/hacienda/presupuesto2006/F_2_0_MarcoFiscal.pdf](http://www.hacienda.gob.ni/hacienda/presupuesto2006/F_2_0_MarcoFiscal.pdf) Page 3. See also comment of question 9.

Peer Reviewer ONE Comment:

Peer Reviewer TWO Comment:
11. Does the executive’s budget or any supporting budget documentation present data on the total government debt outstanding for the budget year?

a. Yes, the data reflect the outstanding debt both at the start of the budget year and at the end of the budget year (and thereby reflect the net borrowing requirement of the budget).
b. Yes, the data reflect the outstanding debt at the end of the budget year.
c. Yes, the data reflect the outstanding debt at the start of the budget year.
d. No, data on the outstanding debt are not presented.
e. Not applicable/other (please comment).

Citation and/or comment: The budgetary documentation integrates information on what will be destined to the national debt of the budgeted year, but not on the balances neither of the beginning of the year, nor of the end. The Central Bank produces information in relation to the debt, but it is not included in documents of the PGR. Only the amounts allocated to pay the redemption and the interests of that year are presented in the PGR.

http://www.hacienda.gob.ni/hacienda/presupuesto2006/Presupuesto_20062345.html

Researcher Response to Peer Reviewer: As it is known, the General Budget of the Republic (PGR) for the analysis has been mainly used. This decision has been made based on the fact that the National Assembly (“Asamblea Nacional”) approved on November 2005 a reform to Law 550 in which it is established that the form of presentation of the PGR approved in this Law will not enter into force until the Budget Year 2008 and this includes – among others – the requirement for a “Marco Presupuestario de Mediano Plazo”. (See http://www.asamblea.gob.ni/ , LAW OF REFORM OF LAW 550 FINANCIAL ADMINISTRATION AND BUDGETARY SYSTEM 565, Approved on November 17, 2005, published on La Gaceta N. 226, November 22nd 2005 [“Article 4.- Addition of a final paragraph to the article of the Law, that will be read as follows “Framework of the General Budget of the Republic Annual Law. The framework of the General Budget of the Republic annual Law that is established in the Article 34 of this Law will enter into force from the budget formulation for the year 2008. Temporarily, the framework of que se establece en el Artículo 34 de la presente Ley será efectiva a partir de la formulación presupuestaria del año 2008. In the mean time, the framework of the General Budget of the Republic annual Law will be governed by the economic classification of Income and Expenditures of the Budgetary Balance Sheet that was approved by the National Assembly in the General Budget of the Republic of the year 2005”].

Peer Reviewer ONE Comment: Nevertheless, the “Marco Presupuestario de Mediano Plazo 2006-2008” in the PGR 2006, presented a section “Balance Fiscal y Financiamiento” (pp. 20-21) with information regarding this question.

Peer Reviewer TWO Comment
12. Does the executive’s budget or any supporting budget documentation present interest payments on the debt for the budget year?

   a. Yes, interest payments on the debt are presented.
   b. No, interest payments on the debt are not presented.
   c. Not applicable/other (please comment).

   Citation and/or comment:
   http://www.hacienda.gob.ni/hacienda/presupuesto2006/Presupuesto_20062345.html

Peer Reviewer ONE Comment:

Peer Reviewer TWO Comment:

13. Does the executive’s budget or any supporting budget documentation present information related to the composition of government debt (such as interest rates on the debt, maturity profile of the debt, currency denomination of the debt, or whether it is domestic and external debt) for the budget year?

   a. Yes, extensive information related to the composition of government debt is presented.
   b. Yes, key additional information is presented, but some details are excluded.
   c. Yes, some additional information is presented, but it lacks important details.
   d. No, additional information related to the composition of government debt is not presented.
   e. Not applicable/other (please comment).

   Citation and/or comment: Information is included on how much of the payments corresponds to internal debt and external debt, how much is short term and long term, how much to amortization and how much to interests, as well as with whom it is the debt, but there is no information on the interest rates nor on the total amount owed in the budgetary information, it is necessary to consult other sources.

Peer Reviewer ONE Comment:

Peer Reviewer TWO Comment:
14. Does the executive’s budget or any supporting budget documentation present the macroeconomic forecast upon which the budget projections are based?

   a. Yes, an extensive discussion of the macroeconomic forecast is presented, and key assumptions (such as inflation, real GDP growth, unemployment rate, and interest rates) are stated explicitly.
   b. Yes, the macroeconomic forecast is discussed and most of the key assumptions are stated explicitly, but some details are excluded.
   c. Yes, there is some discussion of the macroeconomic forecast (and/or the presentation of key assumptions), but it lacks important details.
   d. No, information related to the macroeconomic forecast is not presented.
   e. Not applicable/other (please comment).

Citation and/or comment:

**Researcher’s answer to this question was “d.”** The budgetary information for 2005 does not include documentation on the macroeconomic forecast [see http://www.hacienda.gob.ni/hacienda/CD2005/index.html] although the Central Bank has made several presentations on the matter. The documentation of General Budget of the Republic (PGR) 2006 does include this information within the Medium Term Strategic Framework [at http://www.hacienda.gob.ni/hacienda/presupuesto2006/mpmp1.jsp]

The Law 550 of Financial Administration and Budgetary Regime establishes that in the Message of the Bill that the Presidency sends should include the macroeconomic context, the estimation of the main macroeconomic variables and the assumptions on which they are based, among others [see Government of Nicaragua, La Gaceta, Year CIX, No.167, Monday 29/08/05. Pag.57-64, Arto. 35].

**Researcher Response to Peer Reviewer:** See comment to question 11.

**Peer Reviewer ONE Comment:** A more appropriate response to this question would be “c.” The Exposicion de Motivos included some macroeconomic forecast (GDP growth, inflation and exchange rate) but it is limited. The “Marco Presupuestario de Mediano Plazo 2006-2008” in the PGR 2006, presented some of these information.

**Peer Reviewer TWO Comment:**

**IBP Comment** IBP editors chose answer “d” to maintain consistency with the criteria used for selecting answers across countries. Though the creation of new information documents in 2006 is useful, it has been accounted for and it does not apply for the 2005 budget cycle, which is being evaluated.
15. Does the executive’s budget or any supporting budget documentation show the impact of different macroeconomic assumptions (i.e., sensitivity analysis) on the budget (including expenditures, revenues, and debt)?

   a. Yes, extensive information on the impact of macroeconomic assumptions on the budget is presented, including both a narrative discussion and quantitative estimates.
   b. Yes, information is presented, highlighting the impact of the major macroeconomic assumptions, but some details are excluded.
   c. Yes, some information is presented, but it lacks important details.
   d. No, information on the impact of different macroeconomic assumptions on the budget is not presented.
   e. Not applicable/other (please comment).

Citation and/or comment: There is no information of the impact of macroeconomic assumptions, not even in the PGR 2006. The Law 550 does not establish any requirement regarding this issue.

16. Does the executive’s budget or any supporting budget documentation present information for at least the budget year that shows how policy proposals in the budget, as distinct from existing policies, affect expenditures?

   a. Yes, extensive information on the impact of policy proposals on expenditures is presented, including both a narrative discussion and quantitative estimates.
   b. Yes, information is presented, highlighting the impact of key policy proposals on expenditures, but some details are excluded.
   c. Yes, some information is presented, but it lacks important details.
   d. No, information on the impact of policy proposals on expenditures is not presented.
   e. Not applicable/other (please comment).

Citation and/or comment: The General Budget of the Republic (PGR) does not include more information on the impact, nor on the proposals of public policies and their effect in the expenditure. In the “exposición de motivos” that accompanies the executive’s budget project, in some occasions shifts in the policies are mentioned, but this “exposición de motivos” disappears once the Budget is enacted by the Assembly. Law 550 does not establish any requirement to do so either.

Peer Reviewer ONE Comment: A more appropriate response to this question would be “c.” The exposición de motivos presents some information but it lacks important details. ### Estimates for Years Prior to the Budget Year

18. Does the executive’s budget or any supporting budget documentation present expenditures for the year preceding the budget year (BY-1) that are classified by administrative unit (that is, by ministry, department, or agency)?

   a. All expenditures are classified by administrative unit for BY-1.
   b. Expenditures are classified by administrative unit for BY-1, but some small units are not shown separately.
   c. Expenditures are classified by administrative unit for BY-1, but a significant number of units are not shown separately.
   d. No expenditures classified by administrative unit are presented for BY-1.
   e. Not applicable/other (please comment).

Citation and/or comment:

**Researcher’s answer to this question was “d.”** The budgetary documentation does not include reference to the previous expenditures per unit, nor in general. In general, the Ministry of Finance (MHCP) presents to the National Assembly its report on expenses from January to September of the budgetary year more or less at the same time that the proposal of General Budget of the Republic (PGR) of the executive is delivered, but not like part of the proposal. There is no estimation of the total cost of that budgetary exercise. Law 550 - that has not entered into force - does not establish any requirement either to integrate in the budgetary documentation this information.

**Peer Reviewer TWO Comment:**

**IBP Comment:** IBP editors chose answer “d” to maintain consistency with the criteria used for selecting answers across countries. Only the ‘entes descentralizados’ included information for BY-1.

22. In the executive’s budget or any supporting budget documentation, how many months of actual data are reflected in the expenditure estimates of the year prior to the budget year (BY-1)?

   b. All BY-1 estimates have been updated from the original enacted levels, but reflect less than six months of actual expenditure.
   c. Some BY-1 estimates have been updated from the original enacted levels to reflect actual expenditure.

   Citation and/or comment: Same as Question 18. Actual expenditures are reflected not estimations, in the semester report that the Executive sends to the Assembly, but it is not the totality of the expenditure either since not every unit renders account in a timely manner. See http://www.hacienda.gob.ni/hacienda/libros.jsp
   In some Ministries it is being implemented a centralized registry of their expenditures in real time (Integrated System of Financial and Administrative Management - SIGFA), but this is not yet for the totality of the administrative units. See http://www.consultaciudadana.gob.ni/cciudadana/

República de Nicaragua, Ley 185, Código del Trabajo, Aprobado el 28 de Octubre de 1994, Art. 45 y 47.

On the other hand, since the last years, it has been pointed out that the Government of Nicaragua owes a considerable amount to the Social Security Pensions Fund for patron contributions that were not paid. [See “Nueva Ley quebrará al INSS” El Nuevo Diario, 1º de octubre 2005, Managua, Nicaragua, in http://www.elnuevodiario.com.ni/2005/10/01/nacionales/2406]. It has not been effective any payment nor have passed any budgetary allocation for that.

44. Does the executive’s budget or any supporting budget documentation provide details on the sources of donor assistance, both financial and in-kind?

- a. All sources of donor assistance are identified individually.
- b. At least two-thirds of, but not all, sources of donor assistance, are identified individually.
- c. Less than two-thirds of sources of donor assistance are identified individually.
- d. No sources of donor assistance are identified individually.
- e. Not applicable/other (please comment).

Citation and/or comment: Most part of grants are registered in the General Budget of the Republic (PGR), especially during the last years. However, there is a part that is not clearly presented. For example, Nicaragua has received around US$ 18 millions from the Global Fund against AIDS, the Malaria and Tuberculosis that were distributed mainly among several Ministries. These funds have not been registered in the PGR 2004, or in the one of 2005 of those Ministries.

45. Does the executive’s budget or any supporting budget documentation present information for at least the budget year on tax expenditures?

- a. Yes, extensive information on tax expenditures is presented, including both a narrative discussion and quantitative estimates.
- b. Yes, information is presented, highlighting key tax expenditures, but some details are excluded.
- c. Yes, some information is presented, but it lacks important details.
- d. No, information on tax expenditures is not presented.
- e. Not applicable/other (please comment).

Citation and/or comment: There is no information on that matter in the reviewed documentation.

46. Does the executive’s budget or any supporting budget documentation identify all earmarked revenues?

a. All earmarked revenues are identified individually.
b. At least two-thirds of, but not all, earmarked revenues are identified individually.
c. Less than two-thirds of earmarked revenues are identified individually.
d. No earmarked revenues are identified individually.
e. Not applicable/other (please comment).

Citation and/or comment: The funds that come from loans and grants from the external cooperation with specific destination are generally reflected on the budget of the Ministries, but the totality of them is not presented. It was mentioned before the case of the resources from the Global Fund against AIDS, Malaria and Tuberculosis that adds up an average of US$ 6 million by year, and there are other funds like this. However, from 2006 an important portion of the donor countries have decided to contribute through Global Budget Support, not tagged to any specific allocation.

Peer Reviewer ONE Comment: A more appropriate response would be “b.”

Peer Reviewer TWO Comment:

IBP Comment: IBP editors chose answer “c” to maintain consistency with the criteria used for selecting answers across countries.
47. What percentage of expenditure in the budget year is dedicated to spending on secret items relating to, for instance, national security and military intelligence?

- a. One percent or less of expenditure is dedicated to secret items.
- b. Three percent or less, but more than one percent, of expenditure is dedicated to secret items.
- c. Eight percent or less, but more than three percent, of expenditure is dedicated to secret items.
- d. More than eight percent of expenditure is dedicated to secret items, or the percentage is not available to the public.
- e. Not applicable/other (please comment).

**Citation and/or comment:** There is not accurate information on what is allocated to secret items, although in the last years due to the particularities of the history of Nicaragua, the national security and intelligence expenditures have a higher level of control than in the 80’s. However, since September 11 2001, the USA war against Iraq and the pressures of the US Government with the antiterrorism campaign, there have been funds that did not passed through the General Budget of the Republic (PGR) and on which there is no information. Due to the sending of Nicaraguan troops to Iraq, it was known that there was a “donation” of an anonymous source that financed the expenses of that mission in 2004, that did not count with the support of the National Assembly, which has not done any effort either to know the source of funding, though the legislation allows them to do it.

**Researcher Response to Peer Reviewer:** This question as well as question 81 considers the news published on the media at that time (2004) based on the comments of the President of the Republic, himself, about the origin of the financing of the travel of the Nicaraguan troops to Iraq as part of the occupying forces. This answer also responds to the comment of peer reviewer ONE in question 81.

**Citation and/or comment:** The budget of each Ministry includes some information on the policy goals that have been established, especially those that provide assistance, but it is not clear the link between what is needed, what is planned and what is budgeted. As an example, in the case of the Ministry of Health over the last years, goals were established on the amount of pregnant women to be assisted which was higher than the amount of fertile women in the whole country. It means that not even if all women of Nicaragua were pregnant in the same year, it would have been possible to accomplish the goal established. The same has happened with the goal of the construction and maintenance of roads.

**Peer Reviewer ONE Comment:**

**Peer Reviewer TWO Comment:**
49. Does the executive’s budget or any supporting budget documentation explain how the proposed budget is linked to government’s stated policy goals for a multi-year period (for at least two years beyond the budget year)?

   a. Yes, extensive information on the link between the budget and the government’s stated policy goals over a multi-year period is presented, including both a narrative discussion and quantitative estimates.
   b. Yes, information is presented, highlighting the major policy goals, but some details are excluded.
   c. Yes, some information is presented, but it lacks important details.
   d. No, information on the link between the budget and the government’s stated policy goals over a multi-year period is not presented.
   e. Not applicable/other (please comment).

   Citation and/or comment: Even though since 2002 there has been discussion on the National Plan of Development to 2025 that includes goals for each sector, it is not mentioned in the General Budget of the Republic (PGR) nor has it been included in the budget documentation. The information of the Ministries only includes the goals of the budgeted year and other autonomous entities do not even include it in the budget.

50. Does the executive’s budget or any supporting budget documentation present non-financial data, such as the number of beneficiaries, for expenditure programs?

   a. Non-financial data are presented for all programs.
   b. Non-financial data are presented for programs representing at least two-thirds of, but not all, expenditures.
   c. Non-financial data are presented for programs representing less than two-thirds of expenditure.
   d. No non-financial data are presented.
   e. Not applicable/other (please comment).

   Citation and/or comment: As it was pointed out in previous questions, the main Ministries include information on the amount of people that they plan to assist or attend with their programs, but that is not the case of the other Powers of the State, autonomous entities, universities and municipalities that receive budget transfers. See, as an example: http://www.hacienda.gob.ni/hacienda/CD2005/CSJ2005.pdf

   Peer Reviewer ONE Comment:

51. Are the non-financial data presented useful for assessing how an expenditure program is performing?

   a. The non-financial data are very useful for assessing program performance.
   b. The non-financial data are mostly useful for assessing program performance.
   c. The non-financial data are somewhat useful for assessing program performance.
   d. No non-financial data are provided or they are not useful for assessing program performance.
   e. Not applicable/other (please comment).

   Citation and/or comment: As it was mentioned before, firstly, the data is not complete. Secondly, the information is not used either in the evaluation of the General Budget of the Republic (PGR) or in the evaluation of the performance of the Ministries during the year. Therefore, they are not used to evaluate the performance or the expenditure execution.

   c. Performance indicators are presented for programs representing less than two-thirds of expenditures.
   d. No performance indicators are presented.
   e. Not applicable/other (please comment).

   Citation and/or comment: The budgeted entities don’t present performance indicators for the programs. See as an example:

http://www.hacienda.gob.ni/hacienda/CD2005/minsa.htm However, in the General Budget of the Republic (PGR) 2006, which includes a Medium Term Strategic Framework for three Ministries as a pilot experience, performance indicators have been incorporated in a table with indicators for those Ministries, the Ministry of Health among them. See:

http://www.hacienda.gob.ni/hacienda/presupuesto2006/F_5_1_MGSMP_MINSA.pdf, page 4 and following. But it is not included either in the budget of that year nor for all the Ministries.

Does the executive’s budget or any supporting budget documentation present information on policies (both proposals and existing commitments) in at least the budget year that are intended to benefit directly the country’s most impoverished populations?

a. Yes, extensive information on policies intended to alleviate poverty is presented, including both a narrative discussion and quantitative estimates.
b. Yes, information is presented, highlighting the impact of key policies intended to alleviate poverty, but some details are excluded.
c. Yes, some information is presented, but it lacks important details.
d. No, information on policies intended to alleviate poverty is not presented.
e. Not applicable/other (please comment).

Citation and/or comment:

**Researcher’s answer to this question was “c.”** No all the budgeted entities indicate these policies and those that indicate them do it on a very concise way. Although it can be found in a part of the document of the PGR what will be spent in Reduction of Poverty, this expenditure does not always correspond or is directed to poverty reduction because the classification of the expenditure agreed with the World Bank is very lax and allows to incorporate 100% of the expenses of several Ministries like Health, Education and Agriculture. For example, in the case of the Ministry of Health, in 2005 the expenditure of internal audit or those of administrative and financial management were included like a cost for the reduction of poverty (See [http://www.hacienda.gob.ni/hacienda/CD2005/Estrat_Red_Pobreza1.pdf](http://www.hacienda.gob.ni/hacienda/CD2005/Estrat_Red_Pobreza1.pdf) page 6) Or in the case of Ministry of Agriculture, the expenditure of the Superior Direction of the Ministry or the genealogical registry was included. (See ibid Pages 4 and 5)

**Researcher Response to Peer Reviewer:** The fact that it is declared that the purpose is to reduce poverty or benefit the poorest is not enough. Regarding the General Budget of the Republic (PGR) and the definitions of the policies enclosed with the PGR there are no elements clearly reflecting the precision of the discourse of benefiting the poor, as mentioned above.

**Peer Reviewer TWO Comment:**

**IBP Comment:** IBP editors chose answer “c” to maintain consistency with the criteria used for selecting answers across countries. Missing information is important.

The Information in relation to the customs tariffs is available in the webpage of the General Direction of Custom Services in the Section of customs tariffs: [http://www.dga.gob.ni/](http://www.dga.gob.ni/)

The rents with specific purposes that are collected by different institutions for the services they provide, are not always available to the public and this problem has been indicated at different moments as a source of disagreement from the users and that can lead to corruption.

a. Yes, extensive information on conditions associated with IFI assistance is presented, including both a narrative discussion and quantitative estimates.

b. Yes, information is presented, but some details are excluded.

c. Yes, some information is presented, but it lacks important details.

d. No, information on conditions associated with IFI assistance is not presented.

e. Not applicable/other (please comment).

Citation and/or comment: In the General Budget of the Republic (PGR) information on amounts and sources are presented, as well as what is being allocated to specific projects, but not all the information in relation to the conditions required is included. At different moments, independent economists have indicated the urgency that the “Memorandum of Understanding” between the IMF and the Government of Nicaragua should become public, but these are only known after the Government of Nicaragua gives its approval, which sometimes takes a long time and in some cases, it does not completely occur. Additionally, this information is not enclosed with the PGR, but it must be looked up by independent means. For example, in the webpage of the Central Bank the last published Letter of Intent and Memorandum of Understanding with the IMF is the one of November 2002. See http://www.bcn.gob.ni/publicaciones/acuerdos/ though in the IMF page there is a Letter of Intent from August 2004 http://www.imf.org/external/np/loi/2004/nic/01/index.htm, as well as news on the conclusion of the Approval of the Seventh, Eighth and Ninth Review of the Poverty Reduction and Growth Facility (PRGF) in January of this year. 64. Do citizens have the right in law to access government information, including budget information?

   a. Yes, the right has been codified into law, and citizens are generally able in practice to obtain government information, including budget information.
   b. Yes, the right has been codified into law, but it is sometimes not possible for citizens in practice to obtain government information, including budget information.
   c. Yes, the right has been codified into law, but it is frequently or always impossible in practice to obtain access to government information, including budget information.
   d. No, the right to access government information has not been codified into law, or this right does not include access to budget information.
   e. Not applicable/other (please comment).

Citation and/or comment: The access to information has improved, though there are still grey zones. Additionally, the information mentioned it’s only available on the Internet, which in a country with only 10% of the population with Internet access represents a real constraint. The new Law 550, of Financial Administration and Budgetary System, estates in the Art. 23 that all the kinds of budgets that are referenced by the law, as well as the reports should be available to citizens and the media the latest 15 days after they are released. (See: Government of Nicaragua, La Gaceta, Year CIX, No.167, Monday 29/08/05, Ley 550 Law of Financial Administration and Budgetary Regime, Arto. 23). On the other hand, the Presidency of the Republic along with a number of NGO’s and the media, has been working in the elaboration and enactment of an Access to Public Information Law, that is still in process.

65. Are citizens able in practice to obtain financial information on expenditures for individual programs in a format that is more highly disaggregated than that which appears in the executive’s budget proposal if they request it (for example, from a ministry or agency)?

   a. In practice, highly disaggregated information is available to the public for all programs except those considered related to national security or military intelligence.
   b. In practice, highly disaggregated information is available to the public for programs representing at least two-thirds of, but not all, expenditures.
   c. In practice, highly disaggregated information is available to the public for programs representing less than two-thirds of expenditures.

   a. In practice, no highly disaggregated expenditure information is available.
   b. Not applicable/other (please comment).

Citation and/or comment: In the Executive Branch, there is a general disposition to provide broader financial information than the one included in the General Budget of the Republic (PGR), but this is not the case for the other state authorities (legislative, judiciary, autonomous, Electoral Supreme Council) or the decentralized entities like the public enterprises. It has not been known cases where information was required and denied. It is not usual either this kind of requirement.

66. Are citizens able in practice to obtain non-financial information related to expenditures (for example, number of beneficiaries, number of persons employed by the program, etc.) for individual programs in a format that is more highly disaggregated than that which appears in the executive’s budget proposal if they request it from a ministry or agency?

   a. In practice, highly disaggregated non-financial information is available to the public for all programs except those considered related to national security or military intelligence.
   b. In practice, highly disaggregated non-financial information is available to the public for programs representing at least two-thirds of, but not all, expenditures.
   c. In practice, highly disaggregated non-financial information is available to the public for programs representing less than two-thirds of expenditures.
   d. In practice, no highly disaggregated non-financial expenditure information is available.
   e. Not applicable/other (please comment).

Citation and/or comment: Even though in the last years there has been a greater will from public entities to inform, especially in the cases of the Ministries and the Executive Branch entities, it is still complicated to obtain information disaggregated from the Ministries. The response is usually late or the paperwork is tiresome and many times, simply, it is said that the information required is not available.

Section Three: The Budget Process
## The Budget Process

### Executive’s Formulation of the Budget

**67. How far in advance of the release of the budget is the day of its release known?**

- **a.** The release date is set in permanent law.
- **b.** The executive announces the release date at least two months in advance.
- **c.** The executive announces the release date less than two months but more than two weeks in advance.
- **d.** The executive announces the release date two weeks or less before the release, or makes no announcement.
- **e.** Not applicable/other (please comment).

*Citation and/or comment:* The Executive should present to the National Assembly the proposal of the Annual General Budget of the Republic (PGR) at the latest on October 15th each year. This is stated by the Law 550 (See Government of Nicaragua, La Gaceta, year CIX, No.167, Monday 29/08/05, Law 550 of Financial Administration and Budgetary System, Arto 35)

**68. Does the executive release to the public its timetable for its budget preparation process?**

- **a.** Yes, a detailed timetable is released to the public.
- **b.** Yes, a timetable is released, but some details are excluded.
- **c.** Yes, a timetable is released, but it lacks important details.
- **d.** No, a timetable is not issued to the public.
- **e.** Not applicable/other (please comment).

*Citation and/or comment:* In the documentation reviewed from the Ministry of Finance and Public Credit (MHCP) it was not found information on this matter. This information sometimes is not presented timely not even by the budgeted units. This limits the possibility of working with sectorial units in the definition of their budgets, at the same time, that makes it difficult the negotiation within each Ministry and end up allocating the whole responsibility (power) to the Ministry of Finance and Public Credit (MHCP) which generally argues that is waiting to negotiate with the IMF to make available to the public the preliminary figures and other details.

Citation and/or comment: The Executive only holds consultations with members of the legislature in relation to the legislature’s budget, but not in relation to the General Budget of the Republic (PGR) until the executive’s budget proposal is presented. The priorities are defined by the Executive itself based on the agreements with the IMF and almost in an inertial way, using again the amounts allocated in previous years.

**Researcher Response to Peer Reviewer:** This answer is based on the systematic observation that has been carried out on the budge process for several years, as well as the findings from the Latino American Budget Transparency Index 2003 and 2005 (See [http://www.cisas.org.ni/pdf/Reporte_Regional_Espanol%202005.pdf](http://www.cisas.org.ni/pdf/Reporte_Regional_Espanol%202005.pdf)  

**Peer Reviewer ONE Comment:** The researchers should try to identify officials interviewed with as much specificity as possible according to the Guide. None information is presented (title, ministry, date of interview, name, etc.).

**Peer Reviewer TWO Comment:**
71. Does the executive hold consultations with the public as part of its process of determining budget priorities?

   a. Yes, the executive holds extensive consultations with a wide range of constituencies.
   b. Yes, the executive holds consultations with a range of constituencies, but some key constituencies are excluded.
   c. Yes, the executive holds very limited consultations, involving only a few constituencies.
   d. No, the executive does not typically consult with the public as part of the budget preparation process.
   e. Not applicable/other (please comment).

   Citation and/or comment: As it was pointed out in question 70, the Executive discusses little with other constituencies on the budget priorities. In theory, the National Council of Economic and Social Planning (CONPES) is the round table where civil society organizations are consulted (See http://www.conpes.org.ni/Decreto102-2002.pdf). In this forum, different organized economic and social sectors of the country are represented. One of the arguments given by the Executive in the last years is that the priorities were determined with an open consultation since they respond to the priorities of the National Plan of Development –PND (see http://www.pnd.gob.ni/) However, different things can be argued in this matter; on one side, the priorities defined there are global and strategic, this does not imply participation in determining the priorities of next year. On the other side, it is not clear the relationship between the PND and the PGR in each year. Additionally, it is considered that consultations are limited by the time allocated to them and the amount of information provided that, even though it has been getting better in the last years, it is still incomplete.

   Aside from that, the Decree 102-2002, Decree that established the National Council of Economic and Social Planning (CONPES), states in the Art 4 that “The functions and powers of the Council are… 3: Making recommendations, upon request from the President of the Republic, to the General Budget of the Republic (PGR) annual Bill, to the investment and public expenditure process. (See http://www.conpes.org.ni/Decreto102-2002.pdf page 3, underline is ours). This means that the consultation is subject to the will of the President.

72. When does the executive release a pre-budget statement to the public?

a. The executive releases a pre-budget statement at least four months in advance of the start of the budget year.
b. The executive releases a pre-budget statement at least two months (but less than four months) in advance of the start of the budget year.
c. The executive releases a pre-budget statement, but it is released less than two months before the start of the budget year.
d. The executive does not release a pre-budget statement.
e. Not applicable/other (please comment).

Citation and/or comment: The executive releases information and documents on the macroeconomic situation and other issues, but this is not widely done nor through a formal preliminary document, as it is established in the Good Practices for Budget Transparency defined by the OCDE. This is generally presented in the CONPES around six weeks (August) prior to the presentation of the General Budget of the Republic (PGR) Bill to the National Assembly.

Peer Reviewer ONE Comment:

73. Does the pre-budget statement describe the government’s macroeconomic and fiscal framework?

a. Yes, an extensive explanation of the government’s fiscal and macroeconomic policy is presented, including both a narrative discussion and quantitative estimates.
b. Yes, an explanation is presented; highlighting key aspects of the fiscal and macroeconomic framework, but some details are excluded.
c. Yes, some explanation is presented, but it lacks important details.
d. No, an explanation is not presented, or the executive does not release to the public a pre-budget statement.
e. Not applicable/other (please comment).

Citation and/or comment: As it was pointed out, the executive doesn’t disseminate a formal document with this information, though a macroeconomic and fiscal framework is presented to the CONPES and the National Assembly. This framework not always presents all the details and the information varies during the preparation and presentation of the PGR, depending on the negotiations with the IMF. One of the issues that have been questioned in the last years is the veracity of the fiscal revenues estimations that –as it was mentioned before- in recent years has been reported up to 10% less than what was agreed with the IMF, for the same period.

76. Does a legislative committee (or committees) hold public hearings on the macroeconomic and fiscal framework presented in the budget in which testimony from the executive branch and the public is heard?

a. Yes, public hearings are held on the macroeconomic and fiscal framework in which testimony is heard from the executive branch and a wide range of constituencies.
b. Yes, hearings are held in which testimony is heard from the executive branch and some constituencies.
c. Yes, hearings are held in which testimony from the executive branch is heard, but no testimony from the public is heard.
d. No, public hearings are not held on the macroeconomic and fiscal framework in which testimony from the executive branch and the public is heard.
e. Not applicable/other (please comment).

Citation and/or comment: This corresponds to the Economic Committee. The Central Bank and the MHCP send information to the Assembly, but generally there is no further discussion in that regard and it’s not open either to the public or to the members of the Committee. In 2005 the parties in the Assembly made an agreement with the President to approve the PGR without any modification that, according to the latter, was essential to achieve an agreement with the IMF.

77. Do legislative committees hold public hearings on the individual budgets of central government administrative units (that is, ministries, departments, and agencies) in which testimony from the executive branch is heard?

a. Yes, extensive public hearings are held on the budgets of administrative units in which testimony from the executive branch is heard.
b. Yes, hearings are held, covering key administrative units, in which testimony from the executive branch is heard.
c. Yes, a limited number of hearings are held in which testimony from the executive branch is heard.
d. No, public hearings are not held on the budgets of administrative units in which testimony from the executive branch is heard.
e. Not applicable/other (please comment).

Citation and/or comment: The Economic Committee invites some Ministries and institutions, as well as some civil society organizations, to express their opinion in the discussion and approval process of the PGR. Frequently, the institutions use this space to demand to the Assembly to maintain their budget allocations or to give them a higher allocation.

78. Does a legislative committee (or committees) hold public hearings on the individual budgets of central government administrative units (that is, ministries, departments, and agencies) in which testimony from the public is heard?

   d. No, public hearings are not held on the budgets of administrative units in which testimony from the public is heard.
   e. Not applicable/other (please comment).

   Citation and/or comment: The public can not always participate in the hearings of administrative units. In some cases, the public can attend to listen, but there is no time allocated for questions to the speakers. On one side, the program of these hearings is not always available in advance, and on the other side, there are many limitations to gain admittance to the National Assembly.

80. Does the executive present more details or provide a better explanation of any budget proposal, if members of the legislature (including from minority parties) request such information?

   b. The executive responds to such legislative requests, but its responses are sometimes not appropriate or timely.
   c. The executive responds to such legislative requests, but its responses are typically not appropriate or timely.
   d. The executive responds selectively or ignores such legislative requests.
   e. Not applicable/other (please comment).

   Citation and/or comment: The executive generally responds and attends to the National Assembly requests. However, the responses usually don’t have enough information.

81. Is the legislature (or the appropriate legislative committee) given information for the budget year on the spending of secret items relating to, for instance, national security and military intelligence?

   a. Yes, the legislature is provided extensive information on all spending on secret items.
   b. Yes, the legislature is provided information on spending on secret items, but some details are excluded.
   c. Yes, the legislature is provided some information on spending on secret items, but it lacks important details.
   d. No, the legislature is provided no information on secret items.
   e. Not applicable/other (please comment).

Citation and/or comment: Although in theory there is no spending on secret items, and thus the Parliament does not require that information, the case showed in question 47 suggests that the Parliament does not receive the information either because the Executive does not provide it or because the Parliament itself does not require it. See comments on question 47.

Researcher Response to Peer Reviewer: Both comments correspond to the news published on the media at that time (2004) based on the comments of the President of the Republic, himself, about the origin of the financing of the travel of the Nicaraguan troops to Iraq as part of the occupying forces.

Peer Reviewer ONE Comment: Does comments to question # 47 correspond to the government official interviewed? The researchers should try to identify officials interviewed with as much specificity as possible according to the Guide. **Citation and/or comment:** According to the Constitution, it is possible to amend specific items of the budget if the expenditure remains within the limits of the total expenditure approved and the limit approved can be incremented if it keeps up within the limits that the established incomes collected. The limit of the incomes can be increased if there are new taxes or higher revenue collected, but in any case, the agreements with the IMF drastically reduce the possibility of any modification. Additionally, the limitations associated to the loans or assistance funds that entered as “tight debt” or “compromised” also reduce the capacity of amendment by the legislators.

However, the DGI in general compares its performance in relation to the goals established with the IMF and not in relation with what was established in the Annual Budget Law.

Peer Reviewer ONE Comment:

88. What share of revenue is covered by the in-year reports on actual revenue collections?

   a. In-year reports cover the actual revenue collections of all sources of revenue.
   b. In-year reports cover the actual revenue collections of at least two-thirds of, but not all, sources of revenue.
   c. In-year reports cover actual revenue collections of less than two-thirds of revenue sources.
   d. In-year reports on actual revenue collections are not released to the public.
   e. Not applicable/other (please comment).

Citation and/or comment:

Researcher’s answer to this question was “b.” It has been indicated by independent economists (See Acevedo, Adolfo, “El Déjà vu 2004-2005 taco a taco” mimeografiado, November 11, 2005) that the collected taxes are not totally shown in the reports. In 2004, until the end of the year it was being hidden an over-collection of revenues equivalent to 10% of the estimated total revenues.

Researcher Response to Peer Reviewer: The comment of the Peer Reviewer TWO is really partial. Yes, this is a private calculation but it has been backed and cited by most part of the well known economist in the country, not connected to the Government or the International Financial Institutions (IFIS), like Julio Francisco Báez o Nestor Avendaño to mention the two most well-known. It is not true that Adolfo is committed with one of the parties involved in the debate of the macro-economic management of the country, which is in the hands of the IMF, to a lesser extent the government and the FSLN (because of its complicity or because of letting it go in the National Assembly). In the review the government itself made at the end of 2004, but that they did not include in the General Budget of the Republic (PGR) , they recognized that the undervaluation of the incomes by tax was around 10% of the total and that it was due to the fact that the information considered for the PGR was only “estimates.”

Peer Reviewer ONE Comment:

Peer Reviewer TWO Comment: A more appropriate response to this question would be “e.” Until now, there is no official or private calculation that reveals or shows the share of revenues that is covered by the reports presented by the Executive. On the comment to the actual response, the IBP will have to think about the convenience of exposing the opinion of one economist as a generalized questioning of the specialists in Nicaragua. More, having into account that the opinion that is being referenced comes from a professional that is compromised with one of the parties involved in the debate of the macro-economic management of the country.

IBP Comment: IBP editors chose answer “b” to maintain consistency with the criteria used for selecting answers across countries. The reference cited was used by researchers for their assessment but it does not determine their answer. IBP considers the researcher’s recommendation, the IBP editorial review and the Peer Reviewers comments before deciding on the final answer.

   c. Yes, in-year reports on actual borrowing are released at least semi-annually.
   d. No, in-year reports on actual borrowing are not released.
   e. Not applicable/other (please comment).

   Citation and/or comment: In the three quarterly reports that the Ministry of Finance sends to the Assembly, and in the settlement of the PGR information is included on the external debt that is financed by the PGR, as well as the amounts paid for the debt services. It is not included anything in those reports related to the composition or the amounts of the principal amounts of the debt.

      The Central Bank, on the other hand, elaborates quarterly reports on the debt (See http://www.bcn.gob.ni/publicaciones/Deuda/Trimestral/ ) that is shown in its webpage since 2004. These reports are also sent to the National Assembly and there is a formal presentation.

      However, the reports do not truly reflect the level of net internal borrowing. The internal borrowing is presented at an aggregate level and not in detail, and does not incorporate details on debt that the Central Bank transfers to the Government. Some information on the debt services is provided, but the information of the total debt or the amount redeemed is not included.

Peer Reviewer ONE Comment: Include Central Bank link in Table 2.

Peer Reviewer TWO Comment:
91. Do in-year reports released to the public on actual borrowing present information related to the composition of government debt (such as interest rates on the debt, maturity profile of the debt, and currency denomination of the debt) for the budget year?

92. For in-year reports on actual expenditure released to the public by the executive, how much time typically elapses between the end of the reporting period and when the report is released (e.g., are quarterly reports released less than 4 weeks after the end of the quarter)?

- a. Reports are released 1 month or less after the end of the period.
- b. Reports are released 2 months or less (but more than 1 month) after the end of the period.
- c. Reports are released more than 2 months after the end of the period.
- d. In-year reports are not released.
- e. Not applicable/other (please comment).

Citation and/or comment: Now a day, the quarterly reports are released before the end of the following trimester, but not before two months. In the legislation enacted at the end of 2005 (and that in theory will enter into force this year) establishes that the financial performance evaluation reports will have to be sent to the National Assembly and to the General Auditing of the Republic thirty days following the end of each quarter (See Government of Nicaragua, La Gaceta, Año CIX, No.167, Monday 08/29/05, Law 550 law of Financial Administration and Budgetary Regime, Art 66)

93. Does the executive release to the public a mid-year review of the budget that discusses the changes in economic outlook since the budget was enacted?

   a. Yes, the mid-year review includes an extensive discussion of the economy that includes a revised forecast for the full fiscal year and its effects on the budget.
   b. Yes, the mid-year review includes a discussion of the economy, but it lacks some details.
   c. Yes, the mid-year review includes a discussion of the economy, but it lacks important details.
   d. No, the mid-year review does not include a discussion of the economy, or the executive does not release a mid-year review of the budget.
   e. Not applicable/other (please comment).

Citation and/or comment:

**Researcher’s answer to this question was “d.”** The executive releases to the National Assembly quarterly reports of the incomes and expenditure, but has not released until now a mid-year review that includes an updated forecast of the current fiscal year or the following years, either does it include information on the financial actives and passives or any other information. Basically, a balance of the budget implementation is published with no analysis or forecast on the changes or expenditures paid (See [http://www.hacienda.gob.ni/hacienda/drpresupuesto_informes.jsp](http://www.hacienda.gob.ni/hacienda/drpresupuesto_informes.jsp) as an example. Report January-June 2005). In brief, it is a report with no analysis.

The recently Law 550 passed (See Government of Nicaragua, La Gaceta, Año CIX, No.167, Monday 08/29/05, Law 550 law of Financial Administration and Budgetary Regime) does not establish any regulation nor it does mention any mid-year analysis. It is only mentioned in art. 65 that the quarterly reports and the final budget report should include an analysis of the financial and material results and evaluation of the spending programs and any other information that is considered relevant.

**Researcher Response to Peer Reviewer:** Therefore, it seems that the original response should have been more categorical starting by stating that “The Executive does not release a mid-year review as proposed in answer “d”. I do not understand the comment of the Peer Reviewer.

**Peer Reviewer ONE Comment:**

**Peer Reviewer TWO Comment:** A more appropriate response to this question would be “e” and keeping the comment written as the actual answer.

**IBP Comment:** IBP editors chose answer “d” to maintain consistency with the criteria used for selecting answers across countries.
94. Does the executive release to the public a mid-year review of the budget that includes updated expenditure estimates for the budget year underway?

| a. Yes, the mid-year review includes updated expenditure estimates for the full fiscal year, providing extensive information on why estimates have changed from the original enacted levels. |
| b. Yes, the mid-year review includes updated estimates of expenditure, but some details on why estimates have changed are not provided. |
| c. Yes, the mid-year review includes updated estimates of expenditure, but important details on why estimates have changed are not provided. |
| d. No, the mid-year review does not include updated expenditure estimates for the budget year, or the executive does not release a mid-year review of the budget. |
| e. Not applicable/other (please comment). |

Citation and/or comment:

Researcher’s answer to this question was “d.” As it was said in the previous answer, the Executive does not present any mid-year analysis, just a report. The Law 550 states in Art 65 that there should be a quarterly analysis to evaluate the resulting effects, to interpret the shifts that have changed from the original enacted levels and to look for the causes. (See Government of Nicaragua, La Gaceta, Año CIX, No.167, Monday 08/29/05, Law 550 law of Financial Administration and Budgetary System. Art 65). Nothing is indicated in relation to the inclusion of estimation to the current year.

95. What is the most detail provided in the mid-year review for expenditures?

   a. The mid-year review includes program-level detail for expenditures.
   b. The mid-year review includes departmental totals (or functional totals) and some additional details (for instance, sub-department totals or major programs).
   c. The mid-year review includes only departmental totals (or functional totals).
   d. The mid-year review includes less information than departmental totals (or functional totals) for expenditures, or the executive does not release a mid-year review of the budget.
   e. Not applicable/other (please comment).

   Citation and/or comment:

   Researcher’s answer to this question was “d.” At mid year the total expenditure by ministry with its functional and economic classification is presented, but it does not include any analysis. (See http://www.hacienda.gob.ni/hacienda/drpresupuesto_informes.jsp as an example. Report January-June 2005).

96. Does the executive release to the public a mid-year review of the budget that includes updated revenue estimates for the budget year underway?

| A. Yes, the mid-year review includes updated revenue estimates for the full fiscal year, providing extensive information on why estimates have changed from the original enacted levels. |
| B. Yes, the mid-year review includes updated estimates of revenue, but some details on why estimates have changed are not provided. |
| C. Yes, the mid-year review includes updated estimates of revenue, but important details on why estimates have changed are not provided. |
| D. No, the mid-year review does not include updated revenue estimates for the budget year, or the executive does not release a mid-year review of the budget. |
| E. Not applicable/other (please comment). |

**Citation and/or comment:**

**Researcher’s answer to this question was “d.”** The information presented at mid year does not include updated estimations of revenues; it only includes what has been collected.

97. Does the executive seek input from the legislature when the executive shifts funds between administrative units (except when the amounts are below a certain level, as specified in law or regulation)?

   a. Yes, the executive seeks approval from the legislature before shifting funds between administrative units.
   b. Yes, the executive advises the legislature before shifting funds, giving the legislature an opportunity to block or modify the proposed adjustment.
   c. Yes, the executive seeks legislative approval, but only after the shift of funds has been implemented.
   d. No, the executive shifts funds between administrative units without seeking input from the legislature.
   e. Not applicable/other (please comment).

Citation and/or comment: In practice, the executive makes the transfers without informing previously, in part because the Law 51 of the Budgetary Regime is not clear in that matter. This gave place to several irregularities, some of them led to an important group of public officers from Arnoldo Aleman’s Government (1997-2002) to a trial and later, to exile. The Law 550 of Financial Administration and Budgetary System (See Government of Nicaragua, La Gaceta, Año CIX, No.167, Monday 08/29/05, Law 550 law of Financial Administration and Budgetary Regime) establishes in Art 55 that all shifts in budget allocations between administrative units should be informed quarterly by the Ministry of Finance to the National Assembly and establishes some limitations for this reallocations.

Citation and/or comment: One of the main exceptions is that the funds of external sources are not subject to the national budget law, as required by donors and external borrowers, according to the law itself, so the provisioning complies with the specific conditions of each of the agreements signed by the Government and the donors. Recently, a wide debate has developed around the selection of a Spanish constructing company to build an important infrastructure road, and the way the Spanish Embassy has advocated selecting one of the two companies even though they did not fulfill the requirements. Today, the consequences are of public evidence. The construction has been delayed in more than 50% over what was already anticipated. Recently, also, it has been substantially discussed that some other procurement processes related to the construction that have not followed competitive processes, instead they have been directly contracted, almost in secrecy and with other irregularities. See, as an example: [http://www.laprensa.com.ni/archivo/2005/junio/28/nacionales/nacionales-20050628-13.html](http://www.laprensa.com.ni/archivo/2005/junio/28/nacionales/nacionales-20050628-13.html) Regarding the rest, the media has pointed out other irregularities in the procurement of services in different units of the executive, as the Supreme Court and the Electoral Council.
99. When does the legislature typically approve supplemental budgets?

a. Supplemental budgets are approved before the funds are expended, or the executive rarely proposes a supplemental budget (please specify).
b. Supplemental budgets are approved after the funds are expended, or the executive implements supplemental budgets without ever receiving approval from the legislature (please specify).
c. Not applicable/other (please comment).

Citation and/or comment: Until 2005 the changes in the budget to the budgetary limits were automatic (increases) when the loans and grants were liberated that did not appear in the original budget, or when more revenues was collected than the originally budgeted. Other modifications to the budget require legislative approval. However, there is evidence that in practice some changes should have been approved by the legislature but were not. In a recent modification to the budget 2004 (modification approved in July 2004), the National Assembly included an article stipulating that a monthly review should be made of new debts or grants agreements, which generated an important disapproval from the executive. This obligation is just now starting to be effective.

The Law 550 of Financial Administration and Budgetary Regime (See Government of Nicaragua, La Gaceta, Año CIX, No.167, Monday 08/29/05, Law 550 law of Financial Administration and Budgetary System Art 52) establishes that all project of modification of the PGR Law should be elaborated by the Ministry of Finance and should be presented to the National Assembly for its discussion and approval. If the funds come from earmarked resources (art 53) it could be incorporated to the General Budget of Expenditure and the Ministry of Finance (MHCP) will inform monthly to the National Assembly and the General Auditing of the Republic (it doesn’t say anything that it should be previously approved).

101. When does the legislature approve the expenditure of contingency funds or other funds for which no specific purpose was identified in the budget?

a. Expenditures are approved before the funds are expended, or contingency funds or other funds with no specific purposes are not included in the budget.
b. Expenditures are approved after the funds are expended, but before the end of the fiscal year.
c. Expenditures are approved after the end of the fiscal year, for example in the next budget.
d. Such expenditure takes place without legislative approval.
e. Not applicable/other (please comment).

Citation and/or comment: In the past, the expenditure of contingency funds were executed in case of an increase the cost of basic services or an increase of the employers’ social security contribution, though it has been usually for natural disasters mainly, but it was not clearly established the approval of the legislature in any regulation or any specific period. The funds contemplated to contingencies in the last years (since 2002) have had a very low level (around one million cordobas against to 12 or 14 billions of total budget).

In the Law 550, Art 56 it is established that in case of events such as disasters, wars, generalized internal conflicts or epidemics, the executive by Decree will be authorized to execute the funds allocated to contingencies that can not be higher than 1% (Art 39) of the total PGR. If the amount is not enough, the executive will ask for a reform in the PGR as an urgency matter. (See Government of Nicaragua, La Gaceta, Año CIX, No.167, Monday 08/29/05, Law 550 law of Financial Administration and Budgetary Regime).

It is also established that the use of contingency funds designated to “indispensable and urgent expenditures”(Art 39) whatever is the purpose, it should be informed to the National Assembly the latest fifteen days after it has been authorized by the President of the Republic (Art 52).

### Executive’s Year End Report and the Supreme Audit Institution

**102.** How long after the end of the budget year does the executive release to the public a year-end report or another document that discusses the budget’s actual outcome for the year?

- a. Reports are released six months or less after the end of the fiscal year.
- b. Reports are released 12 months or less (but more than six months) after the end of the fiscal year.
- c. Reports are released more than 12 months after the end of the fiscal year.
- d. The executive does not release a year-end report.

- a. Yes, all data on actual outcomes have been audited.
- b. At least two-thirds, but not all, of the data on actual outcomes have been audited.
- c. Less than two-thirds of the data on actual outcomes have been audited.
- d. None of the data on actual outcomes has been audited, or a year-end report is not released.
- e. Not applicable/other (please comment).

**Citation and/or comment:** The year-end report is presented, but generally the expenditure is not audited externally. It is only done when the funds come from cooperation and the donor requires it, but this information is not public, nor it is include in the year-end report of the General Controller of the Republic.

In the Law 550 it is established that the General Controller of the Republic (GCR) should release a verdict on the auditing of the Financial Balance Sheets to the National Assembly and the Ministry of Finance and Credit at the latest on September 30th (9 months) after the budgetary exercise audited.    b. Yes, an explanation is presented, highlighting key differences, but some details are excluded.
   c. Yes, some explanation is presented, but it lacks important details.
   d. No, an explanation is not presented, or such a report is not released.
   e. Not applicable/other (please comment).

Citation and/or comment: An important detail is that it doesn’t explain what happens with the under-spent funds that in some cases represent a high portion. (see as an example http://www.hacienda.gob.ni/hacienda/PDF/Presupuesto/Informes/inform_Web.pdf, Settlement Report 2004, pages 6 and 7) For the same year, an independent economist detected and indicated an over-collection of more than a billion of córdobas, equivalent to around a 10% of total incomes, but this is not explained nor is registered in the report. (see on the issue http://www.laprensa.com.ni/archivo/2004/agosto/14/economia/economia-20040814-02.html

Peer Reviewer ONE Comment:

Peer Reviewer TWO Comment: It could be added the following comment “this lack of more information on the allocation of the under-executed funds can be observed in pages 19 and 22, where it is said and detailed the composition of the expenditure and the funding source of it. Citation and/or comment: As has been indicated, the year-end report does not include greater explanations for the differences between the enacted levels by the Assembly and the actual revenues. For example, in 2004 it was registered a collection of Income Tax of 114.8% in relation to the PGR updated with the different reforms of the Annual Law of PGR, but the report does not explain why there was such a difference even though the PGR was modified in November of that year (Law 508 Law of Modification to the Annual Law of General Budget of Republic 2004, published in La Gaceta on November 4 of the same year), only one month before ending the budgetary exercise, as it is presented in the same report (see http://www.hacienda.gob.ni/hacienda/drpresupuesto_informes.jsp Settlement Report, 2004, page 11)
107. Does the year-end report, or another document released to the public by the executive (please specify below), explain the difference between the original macroeconomic forecast for the fiscal year and the actual outcome for that year?

The Law 550 does not establish in the description of the year-end report or the evaluation reports any requirement in relation to this information. 108. Does the year-end report, or another document released to the public by the executive (please specify below), explain the difference between the original estimates of non-financial data and the actual outcome?

**Researcher’s answer to this question was “d.”** There is no explanation. The information collected in the year-end report is mainly financial. (See [http://www.presidencia.gob.ni/Presidencia/files_index/presidente/Discur](http://www.presidencia.gob.ni/Presidencia/files_index/presidente/Discur)so/2006/ENERO/Informe-ante-asamblea-nacional-180106.htm )

**Researcher Response to Peer Reviewer:** It is not only a problem of technical language but the absence of any valuation on the performance indicators and results.

**Peer Reviewer ONE Comment:**

**Peer Reviewer TWO Comment:** A more appropriate response to this question would be “c.” The explanations can be found released to the public in the reports 2004 and 2005, through, greater detail and simpler language are two of the main failures.

**IBP Comment:** IBP editors chose answer “d” to maintain consistency with the criteria used for selecting answers across countries. Information presented in the cited document does not assess goals nor any other evaluation indicator information.
110. Does the year-end report, or another document released to the public by the executive (please specify below), explain the difference between the enacted level of funds intended to benefit directly the country’s most impoverished populations and the actual outcome?

a. Yes, an extensive explanation of the differences is presented, including both a narrative discussion and quantitative estimates.
b. Yes, an explanation is presented, highlighting key differences, but some details are excluded.
c. Yes, some explanation is presented, but it lacks important details.
d. No, an explanation is not presented, or such a report is not released.
e. Not applicable/other (please comment).

Citation and/or comment:

Researcher’s answer to this question was “d.” The year-end report only gathers the total funds allocated in the PGR and what was used, without explaining the reason of the differences. In previous years, until 2004 the Government had the obligation to inform to the World Bank annually what had been done as part of the Poverty Reduction Strategy as part of the conditions to obtain the relief of the external debt. This information has not been included in the Annual Information to the National Assembly. (See http://www.secep.gob.ni/documentos/gastoenpobreza/Informe%20Gasto%20Pobreza%202004%20revisado%20_25feb05_.pdf) This report does not give much explanation on the differences between the enacted and the executed. This should be added to the mentioned questioning of what is considered expenditure on poverty, especially in Ministries like Health or Education where the totality of the expenditure is classified as expenditure on Poverty. On the other side, this information does not include any valuation of the non-financial information.

Researcher Response to Peer Reviewer: It is important to point out that the mentioned Report to the World Bank is presented only to the Bank and not always made available nationwide. In fact, moreover, in 2005, as there was not any longer the pressure of HIPC, it was not presented. Therefore, there was no explanation anywhere about the difference between what was budgeted and spent. Additionally, it is only made public if the government authorizes the World Bank to do so, because this is how it is established, as well as in the agreements with the IMF. The answer is “d.”

Peer Reviewer ONE Comment:

Peer Reviewer TWO Comment: A more appropriate response to this question would be “c.” The limitation existing in the reports of the executive released to the public is its predominantly technical speech. There are explanations, but they lack of deepness and a language that could be understood by an average citizen or a university student in his first years of study http://www.secep.gob.ni/documentos/gastoenpobreza/Informe%20Gasto%20Pobreza%202004%20revisado%20_25feb05_.pdf Page 4-11.

IBP Comment: IBP editors chose answer “d” to maintain consistency with the criteria used for selecting answers across countries.
111. Does the year-end report, or another document released to the public by the executive (please specify below), present the actual outcome for extra-budgetary funds?

   a. Yes, extensive information on the actual outcome for extra-budgetary funds is presented, including both a narrative discussion and quantitative estimates.
   b. Yes, information is presented, highlighting key issues, but some details are excluded.
   c. Yes, some information is presented, but it lacks important details.
   d. No, information is not presented on extra-budgetary funds, or such a report is not released.
   e. Not applicable/other (please comment).

112. How long after the end of the fiscal year are the final expenditures of national departments audited and (except for secret programs) released to the public?

   a. Final audited accounts are released to the public six months or less after the end of the fiscal year.
   b. Final audited accounts are released 12 months or less (but more than six months) after the end of the fiscal year.
   c. Final audit accounts are released more than 12 months, but within 24 months of the end of the fiscal year.
   d. Final audited accounts are not completed within 24 months after the end of the fiscal year or they are not released to the public.
   e. Not applicable/other (please comment).

Researcher’s answer to this question was “d.” The General Comptroller of the Republic does not have the capacity to certify and audit the accounts of all the ministries and organizations. Usually, it only carries out audits when there are complaints by irregularities. Most of the executed funds are not audited at all, and when they are, they are not made public nor that the audit is being carried out or its results. (See http://www.cgr.gob.ni/Servicios/filerep/listard.asp?cate=12&cated=Informes%20de%20Auditoría&area=2&aread=Dirección%20General%20de%20Auditorías)

However, the Law 550 establishes that the CGR will have to issue an auditing opinion on the Financial Statements to the National Assembly and the Ministry of Finance and Credit not later than the September, 30 (9 months) after the audited budget year. (See Government of Nicaragua, La Gaceta, Year CIX, No.167, Monday 08/29/05, Law 550 Law of Financial Administration and Budgetary Regime Art. 138). The article mentioned should start to be implemented, in theory, in the PGR 2005.

Researcher Response to Peer Reviewer: From the comment of the Peer Reviewer it may be inferred that this happens or there is true evidence that this will be carried out with the enactment of Law 550, however - in support of our answer – up to now this year (ninth month of the year) there is no reference to on-going or finished audits of the budgeted funds of 2005 in the General Comptroller of the Republic (CGR) website, with the exception of the electoral funds. See http://www.cgr.gob.ni/Servicios/filerep/listard.asp?cate=12&cated=Informes%20de%20Auditoría&area=2&aread=Dirección%20General%20de%20Auditorías

IBP Comment: IBP editors chose answer “d” to maintain consistency with the criteria used for selecting answers across countries.
113. Two years after the completion of a fiscal year, what percentage of expenditure has been audited and (except for secret programs) the reports released to the public?

   a. All expenditures have been audited and the reports released to the public.
   b. Expenditures representing at least two-thirds of, but not all, expenditure have been audited.
   c. Expenditure representing less than two-thirds of expenditure have been audited.
   d. No expenditures have been audited, or the reports have not been released to the public.
   e. Not applicable/other (please comment).

Citation and/or comment:

**Researcher’s answer to this question was “d.”** The percentage of the budget audited two years later is very limited. Lately some special audits have been done over the transferred funds to some of the 153 mayor’s offices of the country and to some ministries (See http://www.cgr.gob.ni/Servicios/filerep/listard.asp?cate=12&cated=Informes%20de%20Auditoria&area=2&aread=Dirección%20General%20de%20Auditorías). However, these audits do not always include the totality of the fiscal year (See Auditing of the Ministry of Foreign Affairs) or do not cover the totality of funds of the period (See Special Auditing of ENEL which only includes the procurement funds of two companies). This should change when Law 550 enters into force.

**Researcher Response to Peer Reviewer:** I do not understand yet the criterion used by the peer reviewers to put “e” (not applicable) as answer, because it is applicable and the audit requirement is not fulfilled.

**Peer Reviewer ONE Comment:**

**Peer Reviewer TWO Comment:** A more appropriate response to this question would be “e” together with the comments that the evaluators added to the present answer.

**IBP Comment:** IBP editors chose answer “d” to maintain consistency with the criteria used for selecting answers across countries.
114. Do year-end audit reports of departmental expenditure that are released to the public include an executive summary?

- a. All of these audit reports include an executive summary.
- b. Most of these reports include an executive summary.
- c. Some of these reports include an executive summary.
- d. None of these audit reports include an executive summary, or such reports are not released to the public.
- e. Not applicable/other (please comment).

115. Must a branch of government other than the executive (such as the legislature or the judiciary) give final consent before the head of the Supreme Audit Institution (SAI) can be removed from office?

- a. Yes, the head of the SAI may only be removed by the legislature or judiciary, or the legislature or judiciary must give final consent before they are removed.
- b. No, the executive may remove the head of the SAI without the final consent of the judiciary or legislature.
- c. Not applicable/other (please comment).

Citation and/or comment: According to the Political Constitution, the five auditors are chosen by the Assembly for a five-year period (See [http://www.asamblea.gob.ni/constitu.htm#tit8cap4](http://www.asamblea.gob.ni/constitu.htm#tit8cap4) Art. 154), but there is nothing explicit about their removal. In principle, on legal matters, things are undone the way they have been done; thus only the National Assembly has the authority to remove any auditor. The President of the Auditors Union is elected among the five auditors for a one-year period, with the possibility of the reelection (CP Art. 156). There is nothing established either regarding its removal.

   c. Yes, the SAI releases audits representing less than two-thirds of all extra-budgetary funds.

117. Beyond the established year-end attestation audits, does the Supreme Audit Institution (SAI) have discretion in law to undertake those audits it may wish to?

   a. The SAI has full discretion to decide which audits it wishes to undertake.
   b. The SAI has significant discretion, but faces some limitations.
   c. The SAI has some discretion, but faces considerable limitations.
   d. The SAI has no discretion to decide which audits it wishes to undertake.
   e. Not applicable/other (please comment).

   Citation and/or comment: Frequently, the OSA decides based on political considerations. Especially because the OSA is an institution where the two main political parties have a participation in the Directive Council since the constitutional reform of 2000. The resolutions, which must be approved by the Council, often are not made public because of the political implications for some of the parties.

Citation and/or comment: The General Comptroller of the Republic (GCR) presents its demands to the Executive, which in turn includes in the PGR an amount that usually does not cover the demand and the National Assembly finally approves whatever it considers pertinent, generally in consistence with what was presented by the Executive. The GCR receives external funding through grants from organisms like the IADB or the World Bank.

   d. No, audit reports are not scrutinized.

Citation and/or comment: In the last years, the CGR has presented few auditing reports per year, except to releasing from fault some civil employee accused of corruption. For those cases, a special commission was formed (one of the cases was the president of the Republic) that in the end was settled according to the interests of the groups with majority in the National Assembly, as a result of a political agreement and not according to the law.

Researcher Response to Peer Reviewer: It is not necessary to interview any civil servant; it is enough with visiting the General Controller of the Republic (CGR) webpage and look at his work. See www.cgr.gob.ni

The case referred is the accusation made to some civil servants and ex-civil servants for the use of public resource for partisan activities. One of the accused was the President of the Republic himself, Eng. Enrique Bolaños and another one was the then President Arnoldo Aleman. The first one was initially declared guilty and the second one innocent. Later, in the National Assembly, and as a result of a political agreement the President was exonerated, but some of his reliable civil servants remained guilty. None of them are in prison or has been prosecuted or punished. See http://www.cgr.gob.ni/Servicios/filerep/archivos/Auditoria%20especial%20sobre%20denuncia%20de%20delitos%20electorales%202011-04.doc

120. Does the executive make available to the public a report on what steps it has taken to address audit recommendations or findings that indicate a need for remedial action?

a. Yes, the executive reports publicly on what steps it has taken to address audit findings.
b. Yes, the executive reports publicly on most audit findings.
c. Yes, the executive reports publicly on some audit findings.
d. No, the executive does not report on steps it has taken to address audit findings.
e. Not applicable/other (please comment).

Citation and/or comment: Or, it does only if the National Assembly specifically asks for it. In the few audits that the General Comptroller has carried out, even when there is responsibility of the public servants, there hasn’t been a serious answer from the Executive to take care of the proven facts. Often, the civil employees take advantage of other laws to avoid responding. Also, high ranked civil employees have sought protection in the past before the courts for not responding to the requests of information of the CGR.
