Qatar’s score of 0 on the 2015 Open Budget Index has remained the same as its score in 2012.

Moreover, the Government of Qatar has failed to make progress in the following ways:
- Not making the Pre-Budget Statement, Executive’s Budget Proposal, Enacted Budget, In-Year Reports, Mid-Year Review, Year-End Report, and Audit Report available to the public.
- Not producing a Citizens Budget.

Evidence suggests that transparency alone is insufficient for improving governance, and that public participation in budgeting can maximize the positive outcomes associated with greater budget transparency.

To measure public participation, the Open Budget Survey assesses the degree to which the government provides opportunities for the public to engage in budget processes. Such opportunities should be provided throughout the budget cycle by the executive, the legislature, and the supreme audit institution.

Qatar’s score of 0 out of 100 indicates that the public is provided with no opportunities to engage in budget processes.
The Open Budget Survey examines the extent to which legislatures and supreme audit institutions are able to provide effective oversight of the budget. These institutions play a critical role – often enshrined in national constitutions – in planning budgets and overseeing their implementation.

**Oversight by the Legislature**

The legislature provides no oversight during the planning stage of the budget cycle and no oversight during the implementation stage of the budget cycle.

The legislature does not have a specialized budget research office. The executive does not receive prior approval by the legislature before implementing a supplemental budget. Finally, in both law and practice, the legislature is not consulted prior to the virement of funds in the Enacted Budget, spending any unanticipated revenue, or spending contingency funds that were not identified in the Enacted Budget.

**Oversight by the Supreme Audit Institution**

There is no supreme audit institution in Qatar.

**RECOMMENDATIONS**

**Improving Transparency**
Qatar should prioritize the following actions to improve budget transparency:
- Publish a Pre-Budget Statement, Executive’s Budget Proposal, Enacted Budget, In-Year Reports, Mid-Year Review, Year-End Report, and Audit Report.
- Produce and publish a Citizens Budget.

**Improving Participation**
Qatar should prioritize the following actions to improve budget participation:
- Establish credible and effective mechanisms (i.e., public hearings, surveys, focus groups) for capturing a range of public perspectives on budget matters.
- Hold legislative hearings on the budgets of specific ministries, departments, and agencies as well as on audit reports at which testimony from the public is heard.
- Establish formal mechanisms for the public to assist the supreme audit institution to formulate its audit program and participate in audit investigations.

**Improving Oversight**
Qatar should prioritize the following actions to strengthen budget oversight:
- Establish a specialized budget research office for the legislature.
- In both law and practice, ensure the legislature is consulted prior to the virement of funds in the Enacted Budget, the spending of any unanticipated revenue, and the spending of contingency funds that were not identified in the Enacted Budget.
- Establish an independent supreme audit institution.
The Open Budget Survey uses internationally accepted criteria developed by multilateral organizations such as the International Monetary Fund (IMF), the Organisation for Economic Co-operation and Development (OECD), and the International Organisation of Supreme Audit Institutions (INTOSAI). It is a fact-based research instrument that assesses what occurs in practice through readily observable phenomena. The entire research process took approximately 18 months between March 2014 and September 2015 and involved about 300 experts in 102 countries. The Survey was revised somewhat from the 2012 version to reflect emerging developments in accepted good practice and to strengthen individual questions. A full discussion of these changes can be found in a technical note on the comparability of the Open Budget Index over time (see below).

Survey responses are typically supported by citations and comments. This may include a reference to a public document, an official statement by the government, or comments from a face-to-face interview with a government official or other knowledgeable party.

The Survey is compiled from a questionnaire completed for each country by independent budget experts who are not associated with the national government. Each country’s questionnaire is then independently reviewed by an anonymous expert who also has no association to government. In addition, IBP invites national governments to comment on the draft results from the Survey and considers these comments before finalizing the Survey results.

IBP did not receive comments on the draft Open Budget Questionnaire results from the Government of Qatar.

Research to complete Qatar’s Open Budget Survey was undertaken by the Open Budget Initiative, International Budget Partnership, 820 First Street NE, Suite 510, Washington DC, 20002, info@internationalbudget.org.
