Sudan’s score of 10 out of 100 is substantially lower than the global average score of 45.

**Usefulness of Budget Information Throughout the Budget Cycle**

- **Budget Formulation**
  - Pre-Budget Statement
    - Published late
  - Executive’s Budget Proposal
    - Produced for Internal Use
    - Not produced

- **Budget Oversight**
  - Mid-Year Review
    - Not produced
  - In-Year Reports
    - Produced for Internal Use
  - Enacted Budget
    - Extensive
  - Citizens Budget
    - Not produced
  - Audit Report
    - Produced for Internal Use
    - Published late

- **Budget Approval**
  - Year-End Report
    - Limited

**The Availability of Budget Documents Over Time**

- **Document**
  - Pre-Budget Statement: Not produced/published late
  - Executive’s Budget Proposal: Not produced/published late
  - Enacted Budget: Published
  - Citizens Budget: Published
  - In-Year Reports: Published
  - Mid-Year Review: Published
  - Year-End Report: Published
  - Audit Report: Published

Note: The following categories are used to report the usefulness of each document: Not produced, Published Late, Internal Use, Scant, Minimal, Limited, Substantial, or Extensive.
Sudan’s score of 10 on the 2015 Open Budget Index is largely the same as its score in 2010. Since 2010, the Government of Sudan has decreased the availability of budget information by:

- Producing the Audit Report for internal use only.

Moreover, the Government of Sudan has failed to make progress in the following ways:

- Not making the Executive’s Budget Proposal and In-Year Reports available to the public.
- Not making the Pre-Budget Statement available to the public in a timely manner.
- Not producing a Citizens Budget and Mid-Year Review.

Evidence suggests that transparency alone is insufficient for improving governance, and that public participation in budgeting can maximize the positive outcomes associated with greater budget transparency.

To measure public participation, the Open Budget Survey assesses the degree to which the government provides opportunities for the public to engage in budget processes. Such opportunities should be provided throughout the budget cycle by the executive, the legislature, and the supreme audit institution.

Sudan’s score of 0 out of 100 indicates that the public is provided with no opportunities to engage in budget processes.
The Open Budget Survey examines the extent to which legislatures and supreme audit institutions are able to provide effective oversight of the budget. These institutions play a critical role—often enshrined in national constitutions—in planning budgets and overseeing their implementation.

### Oversight by the Legislature

- **Planning**: Limited
- **Implementation**: No

The legislature provides **limited** oversight during the planning stage of the budget cycle and **no** oversight during the implementation stage of the budget cycle.

The Executive’s Budget Proposal is not provided to legislators at least three months before the start of the budget year. The executive does not receive prior approval by the legislature before implementing a supplemental budget. Finally, in both law and practice, the legislature is not consulted prior to the virement of funds in the Enacted Budget, spending any unanticipated revenue, or spending contingency funds that were not identified in the Enacted Budget.

### Oversight by the Supreme Audit Institution

- **Planning**: Limited
- **Implementation**: No

The supreme audit institution provides **weak** budget oversight.

Under the law, it has significant discretion to undertake audits as it sees fit. However, the head of the supreme audit institution can be removed without legislative or judicial approval, which undermines its independence. Finally, the supreme audit institution is provided with insufficient resources to fulfill its mandate and has no quality assurance system in place.

### Recommendations

#### Improving Transparency

Sudan should prioritize the following actions to improve budget transparency:
- Publish an Executive’s Budget Proposal, In-Year Reports, and an Audit Report.
- Publish in a timely manner a Pre-Budget Statement.
- Produce and publish a Citizens Budget and Mid-Year Review.

#### Improving Participation

Sudan should prioritize the following actions to improve budget participation:
- Establish credible and effective mechanisms (i.e., public hearings, surveys, focus groups) for capturing a range of public perspectives on budget matters.
- Hold legislative hearings on the budgets of specific ministries, departments, and agencies at which testimony from the public is heard.
- Establish formal mechanisms for the public to assist the supreme audit institution to formulate its audit program and participate in audit investigations.

#### Improving Oversight

Sudan should prioritize the following actions to strengthen budget oversight:
- Ensure the Executive’s Budget Proposal is provided to legislators at least three months before the start of the budget year.
- Ensure the executive receives prior approval by the legislature before implementing a supplemental budget.
- Require legislative or judicial approval to remove the head of the supreme audit institution.
The Open Budget Survey uses internationally accepted criteria developed by multilateral organizations such as the International Monetary Fund (IMF), the Organisation for Economic Co-operation and Development (OECD), and the International Organisation of Supreme Audit Institutions (INTOSAI). It is a fact-based research instrument that assesses what occurs in practice through readily observable phenomena. The entire research process took approximately 18 months between March 2014 and September 2015 and involved about 300 experts in 102 countries. The Survey was revised somewhat from the 2012 version to reflect emerging developments in accepted good practice and to strengthen individual questions. A full discussion of these changes can be found in a technical note on the comparability of the Open Budget Index over time (see below).

Survey responses are typically supported by citations and comments. This may include a reference to a public document, an official statement by the government, or comments from a face-to-face interview with a government official or other knowledgeable party.

The Survey is compiled from a questionnaire completed for each country by independent budget experts who are not associated with the national government. Each country’s questionnaire is then independently reviewed by an anonymous expert who also has no association to government. In addition, IBP invites national governments to comment on the draft results from the Survey and considers these comments before finalizing the Survey results.

Despite repeated efforts, IBP was unable to get comments on the draft Open Budget Questionnaire results from the Government of Sudan.

Research to complete this country’s Open Budget Survey was undertaken by:
