Open Budget Survey 2017
Questionnaire

South Sudan

January 2018
COUNTRY QUESTIONNAIRE: SOUTH SUDAN

PBS-1: What is the fiscal year of the PBS evaluated in this Open Budget Survey questionnaire? Please enter the fiscal year in the following format: “FY YYYY” or “FY YYYY-YY.”

Answer: FY 2016-17

Sources: The PBS is not widely circulated to the public but among the government agencies and mainly in hard copy. The only evidence I can display regarding the certainty of the FY is the national budget speech presented to the national Legislative assembly for FY 2016/17 by the minister of Finance.

Comments: Researcher: Such documents are not shared widely as earlier indicated.

IBP comment: Clarification: the government initially agreed to review the draft Open Budget Survey questionnaire, but did not provide any comments on the Survey questions. The survey tool used, however, did not allow IBP to leave the government responses blank. Therefore, the “I am not qualified to judge this indicator” option had to be selected. The appropriate answer is “NOT APPLICABLE”, because the government did not provide any comments to any of the questions in the Open Budget Survey.

PBS-2: When is the PBS made available to the public?

a. (100) At least four months in advance of the budget year, and at least one month before the Executive’s Budget Proposal is introduced in the legislature
b. (67) At least two months, but less than four months, in advance of the budget year, and at least one month before the Executive’s Budget Proposal is introduced in the legislature
c. (33) Less than two months in advance of the budget year, but at least one month before the Executive’s Budget Proposal is introduced in the legislature
d. (0) The PBS is not released to the public, or is released less than one month before the Executive’s Budget Proposal is introduced to the legislature

Answer: d.

Sources: Article 49(3) in the Public Financial Management Act 2011 stipulates that all annual reports and past, current or projected fiscal activity be made public. The PBS would fall in this category but the specific dates have not been indicated. However in past rounds of the budget exercise, only a circular detailing the purpose of holding a budget workshop requesting ministries and other government entities to attend has been posted on the ministry of finance website. As seen through the link (http://grss-mof.org/news/budget-execution-workshop/ (http://grss-mof.org/news/budget-execution-workshop/)), it was posted on the 1st November 2013. November is also the month designated for the ministry of Finance to get approval for the PBS from the National Council of ministers (Refer to Public Financial Management Act 2011 article 25(1).

Comments: Researcher: The preparatory phases of the budget process is used entirely for internal purposes and such documents are inaccessible by the public. Despite my explanation above, the budget for the FY 2016/17 is late by six months so the public is not aware of when this PBS was released.

**Answer**: c.

**Sources**: The Undersecretary of Planning in the Ministry of Finance and Economic Planning told our colleague Mr. Joseph Kulang that it was passed and for internal use. Besides that the Public Financial Management Act 2011 25(1) does stipulate that it has to be approved by the national council of ministers. It is therefore a prerequisite document that is produced for the budget preparations to progress.

**Comments**: Researcher: I consulted the above-mentioned contact and specifically mentioned that it is only produced for internal use. He contacted the undersecretary of planning in National Ministry of Finance and Economic planning in South Sudan.

---

**PBS-6b**: If you selected option "c" or "d" in question PBS-6a above, please specify how you determined whether the PBS was produced for internal use only, versus not produced at all. If option "a," "b," or "e" was selected in question PBS-6a, researchers should mark this question "n/a."

**Answer**: As mentioned early consultations were made by our contact, Mr. Joseph Kulang to the Undersecretary of Planning in the National ministry of Finance and Economic Planning who stated that such preparatory phase is not produced for public use.

**Sources**: National Ministry of Finance and Economic Planning, Undersecretary of Planning Republic of South Sudan.

c. (33) Less than two months in advance of the budget year, but at least in advance of the budget being approved by the legislature
d. (0) The EBP is not released to the public, or is released after the budget has been approved by the legislature

Answer: d.

Sources: Public Financial Management and Accountability Act, 2011 Article 49(1) states that it should be released immediately to the public. http://grss-mof.org/wp-content/uploads/2014/04/RSS_PFMAA-2011.pdf However, the budget proposal has been passed by the national assembly since the 8th December but the document is not in circulation. What is available and easily accessible on both soft and hard copies is the national budget speech made by the minister of Finance and Economic Planning. Of importance is my recent meeting with a staff from the public accounts committee who spoke on condition of anonymity, he stated that the minister of finance and planning provides hard copies of draft proposals to the committee of economics and finance in the national assembly and if one is interested, they can approach this committee and obtain it. However, not many people know about this process and as such do not follow up on it. Such information is also not openly available to the public. I was given a hard copy in addition to what I was able to access through Mr.Kulang.

Comments: Researcher: The Budget proposal is never discussed outside of the government structures with citizens nor is it shared. In the Public Financial Management and Accountability Act, 2011 the process highlight indicates that the communication and preparation of the budget is done within the different ministries, state line ministries and government parastatals. The EBP is produced in both soft and hard copies but there is no consistency in the period in which it is made available.

| e. Not applicable (the document is publicly available) |

Answer: b.

Sources: I have a hard copy so it is evidence that it is produced. However in the ministry of Finance and Economic Planning website, draft copies of previous years are posted on the website; [http://grss-mof.org/news/fy-2014-15-budget-presented-to-the-…](http://grss-mof.org/news/fy-2014-15-budget-presented-to-the-parliament-today), so I think it is eventually published but not consistent in the time frame gazetted for it to happen as is seen in the Public Financial and Management Accountability Act 2011 49(1).

Comments: Researcher: I have seen past EBP published in the ministry of finance and economic planning website. The timing of it being published is however very inconsistent. Additionally, in my recent meeting with a staff from the public accounts and fiscal committee who spoke on condition of anonymity, he stated that the minister of finance and planning provides hard copies of draft proposals to the committee of economics and finance in the national assembly and if one is interested, they can approach this committee and obtain it. a. Yes
b. No

Answer: b.

Sources: Through our consultations with ministry of Finance and Planning officials and other economists in the country, South Sudan does not have a Citizen’s Budget.

Comments: Researcher: The Chief Economist in United Nations Development Program in Juba, South Sudan -Mr. Frederick Mugisha stated that this country does not have a citizen’s budget. He mentioned that normally such initiatives are championed by the civil society or a demand is created for it by the citizenry however this hasn’t happened.

**IBP comment:** Clarification: the government initially agreed to review the draft Open Budget Survey questionnaire, but did not provide any comments on the Survey questions. The survey tool used, however, did not allow IBP to leave the government responses blank. Therefore, the “I am not qualified to judge this indicator” option had to be selected. The appropriate answer is “NOT APPLICABLE,” because the government did not provide any comments to any of the questions in the Open Budget Survey.

**EB-6b:** If you selected option “c” or “d” in question EB-6a above, please specify how you determined whether the EB was produced for internal use only, versus not produced at all. If option “a,” “b,” or “e” was selected in question EB-6a, researchers should mark this question “n/a.”

**Comments:** The Ministry, in addition to the quarterly reports, publishes a report encompassing the budget and the wider state of the economy. However, it looks in more depth at macroeconomic performance over the first half of the year than budget performance, and it does not update projections; rather it reviews performance over the first half. It partially fulfills the role of an MYR and is distinct from the IYR; “assess[ing] the state of the economy relative to the initial macroeconomic forecast” is covered. “QUARTERLY MACROECONOMIC UPDATE” [http://grss-mof.org/wp-content/uploads/2016/05/Q2-Report-201…](http://grss-mof.org/wp-content/uploads/2016/05/Q2-Report-2015-16-20-April.pdf) |

Answer: As mentioned early we consulted with the officials at the ministry of finance and planning and they mentioned to us that they normally produce mid-year reports annually. However, as a result of the crisis that happened in July 2016, they were unable to prepare one. Regardless of last year’s situation, only one progress report was published back in 2012 so the precedence set points to no sharing of such information on a public forum.

IBP comment: Clarification: the government initially agreed to review the draft Open Budget Survey questionnaire, but did not provide any comments on the Survey questions. The survey tool used, however, did not allow IBP to leave the government responses blank. Therefore, the “I am not qualified to judge this indicator” option had to be selected. The appropriate answer is “NOT APPLICABLE”, because the government did not provide any comments to any of the questions in the Open Budget Survey: Year-End-Report: Cumulative quarterly reports are not accepted as Year-End Reports in order to ensure cross-country comparison. Additionally, in principle, In-Year Reports are not accepted as Year-End Reports, because a Year-End Report usually takes longer to produce and generally has a somewhat different focus and function. Hence, the report that was cited here does not qualify as a YER but as an IYR, the reasons being the following: • The content is the same as that of previous In-Year-Reports; • Previous reports with the same content only covered 3-months periods; • The ‘Budget Execution Report’ is also listed as an In-Year-Report; Due to this, according to the OBS Survey methodology, the YER will be considered not publicly available in South Sudan all questions regarding the YER (questions 84-94 in Section 3) will be responded to with ‘d’ or ‘b’ because the report is considered not publicly available.

YER-3a: If the YER is published, what is the date of publication of the YER? Researchers should respond to this question if the document is published either within the time frame accepted by the OBS methodology or too late. Please enter the date in the following format: “DD Month YYYY.” For example, 5 September 2016 should be entered as 05 September 2016. If the document is not published or not produced, please mark this question “n/a.”

Answer: d.

Sources: Public Financial and Management Accountability Act 2011 32 (2). In our consultations with the ministry of finance and planning personnel, they cited a challenge in the proper storage of documents. So I think it is produced as mandated by the law but either there is a lack of manpower to upload these documents or it is specifically meant for internal use only. I was able to get the Full year macro fiscal report for the FY 2015/16 and it was produced in October 2016 last year so it is produced and sometimes published but later than usual.

Researcher response: I have a query, the EBP has since December not been assented to by the president. What i have at my disposal is the budget speech that cannot adequately answer the questions being raised here. So is it appropriate for me to use the FY 2015/16 BUDGET or any document related to it because the draft is not online.

IBP comment: Clarification: the government initially agreed to review the draft Open Budget Survey questionnaire, but did not provide any comments on the Survey questions. The survey tool used, however, did not allow IBP to leave the government responses blank. Therefore, the “I am not qualified to judge this indicator” option had to be selected. The appropriate answer is “NOT APPLICABLE”, because the government did not provide any comments to any of the questions in the Open Budget Survey.

7: Does the Executive’s Budget Proposal or any supporting budget documentation present expenditure estimates for a multi-year period (at least two-years beyond the budget year) by any of the three expenditure classifications (by administrative, economic, or functional classification)?

a. (100) Yes, multi-year expenditure estimates are presented by all three expenditure classifications (by administrative, economic, and functional classification).
b. (67) Yes, multi-year expenditure estimates are presented by two of the three expenditure classifications.
c. (33) Yes, multi-year expenditure estimates are presented by only one of the three expenditure classifications.
d. (0) No, multi-year expenditure estimates are not presented by any expenditure classification.
e. Not applicable/other (please comment).

Answer: d.

Opinion: Not Qualified

IBP comment: Clarification: the government initially agreed to review the draft Open Budget Survey questionnaire, but did not provide any comments on the Survey questions. The survey tool used, however, did not allow IBP to leave the government responses blank. Therefore, the “I am not qualified to judge this indicator” option had to be selected. The appropriate answer is “NOT APPLICABLE”, because the government did not provide any comments to any of the questions in the Open Budget Survey. As explained in question YER-2 in Section 1, cumulative quarterly reports are not accepted as Year-End Reports. Due to this, the YER is considered not publicly available. Due to this, all questions regarding the YER (questions 84-94 in Section 3) will be responded to with ‘d’ or ‘b’ (for 2-choice questions). The response to this question was changed from ‘a’ to ‘d’. Please see YER-2 for a detailed explanation.

87: Does the Year-End Report present the differences between the enacted levels (including in-year changes approved by the legislature) and the actual outcome for revenues?

a. (100) Yes, estimates of the differences between the enacted levels and the actual outcome for all revenues are presented, along with a narrative discussion.
b. (67) Yes, estimates of the differences between the enacted levels and the actual outcome for all revenues are presented, but a narrative discussion is not included.
c. (33) Yes, estimates of the differences between the enacted levels and the actual outcome for some but not all revenues are presented.
d. (0) No, estimates of the differences between the enacted levels and the actual outcome for revenues are not presented.
e. Not applicable/other (please comment).

Answer: d.

Comments: Researcher: Yes it shows the estimates, the actual and outturns incurred on table 3 page 10.

**90:** Does the Year-End Report present the differences between the original estimates of government borrowing and debt, including its composition, for the fiscal year and the actual outcome for that year?

**a.** (100) Yes, estimates of the differences between all of the original estimates of government borrowing and debt for the fiscal year and the actual outcome for that year are presented, along with a narrative discussion.

**b.** (67) Yes, estimates of the differences between all the original estimates of government borrowing and debt for the fiscal year and the actual outcome for that year are presented, but a narrative discussion is not included.

**c.** (33) Yes, estimates of the differences between some but not all of the original estimates of government borrowing and debt for the fiscal year and the actual outcome for that year are presented.

**d.** (0) No, estimates of the differences between the original estimates of government borrowing and debt for the fiscal year and the actual outcome for that year is not presented.

**e.** Not applicable/other (please comment).

**Answer:** d.

**Comments:** Researcher: Yes on page 17 table 8, the debts and the new borrowing and total is shown in the fiscal year, broken down into the different creditors and the closing budget as per 30th June 2016. Even though the interest rate is not indicated on that table, it is shown in previous table number 4 on page 12.

**91:** Does the Year-End Report present the differences between the original macroeconomic forecast for the fiscal year and the actual outcome for that year?

**a.** (100) Yes, estimates of the differences between all of the original macroeconomic assumptions for the fiscal year and the actual outcome for that year are presented, along with a narrative discussion.

**b.** (67) Yes, estimates of the differences between all the original macroeconomic assumptions for the fiscal year and the actual outcome for that year are presented, but a narrative discussion is not included.

**c.** (33) Yes, estimates of the differences between some but not all of the original macroeconomic assumptions for the fiscal year and the actual outcome for that year are presented.

**d.** (0) No, estimates of the differences between the original macroeconomic forecast for the fiscal year and the actual outcome for that year is not presented.

**e.** Not applicable/other (please comment).

**Answer:** d.

**Comments:** Researcher: The report extensively discusses the macroeconomic forecasts for the fiscal year and the actual outcome for that year. They mention the key influencing factors that affected the fiscal year from meeting its targets with some of these factors going as far as shocks suffered in 2012. **Answer:** d.

**Comments:** Researcher: It is not easy to deduce if the fund allocated was spent on the vulnerable because the tables in appendix 1-6 from page 21-29 all provide details on expenditure mainly salaried to the different agencies and states. In looking at these appendices, the figures highlighted red are mainly related to security, foreign affairs or particular components of the infrastructure sector. The sectors that include the vulnerable which is the social and humanitarian affairs, has two out of the five commissions, South Sudan Relief and Rehabilitation commission and Gender, Child and Social welfare who have surpassed their budget which implies there is a focus on humanitarian needs by the government due to the growing demands within the country. The rest have spent far less than is budgeted for. It is hard to specifically state which segment of the vulnerable have been spent on given the lump sum figures provided.

Comments: Researcher: However, there is a National Fiscal and Financial Allocation and Monitoring Commission. It is stipulated in the transitional constitution of the Republic of South Sudan in Chapter V 179 (1-5) in page 67-68. Further evidence in support of its staffing and resources adequacy includes the budget line that is allocated for this institution in every round of budget as well as in the quarterly reports that are shared. In the budget book FY 2015/16 on page 116, the salaries and wages are indicated. In the itemised budget for the same FY 2015/16 on page 15 and 21 respectively, further illustration of resources for different activities are allocated to the institution. I have searched for their website online and have not been able to find anything. I have also not been able to see any report from this commission but since oversight of this commission falls under the public accounts committee, I do not think the public has access to the report. I was nonetheless told by the staff in the public accounts committee I spoke to that they do receive reports from this commission. We however cannot access it. The news pressing just used its platform as a news outlet to report the president’s decree as one among many commissions that have been created. c. (33) No, the IFI does not publish its own macroeconomic or fiscal forecast, but it does publish an assessment of the official macroeconomic and/or fiscal forecasts produced by the executive.

d. (0) No, there is no IFI; or the IFI neither publishes its own macroeconomic and/or fiscal forecasts, nor a commentary on the official forecasts produced by the executive.

e. Not applicable/other (please comment).

Answer: d.

Sources: In my discussion with the former finance personnel who also held several other positions such as the chairman of investment corporation in the central Equatoria state amongst other portfolios, he states the role of this institution as one heavily leaning towards fiscal functions rather than macroeconomic ones. He mentions the key roles of this body include; directing the different government entities towards the proper use of resource; ensuring that no resource is diverted in accordance with the budget; projects funded according to schedule as well as ensuring financial regulations are followed systematically. He sums it up by saying that in addition to these roles, this institution will follow up on complaints made about specific ministries if and when complaint is made to them. This can also be further backed up by the functions that it is expected to perform as stipulated in the constitution section V 179;2-a-f that further echoes the above roles as fiscal and not macroeconomic.

Comments: Researcher: In the budget and quarterly reports earlier shared, the budget line indicates funding towards specific directorates such as directorates of allocation, monitoring; training and research. Even when the indicators for these activities are not indicated, we can infer that it is from...
their examining of reports from different government institutions as one way of telling their fiscal role. These are official forecasts therefore used by the government.

b. (67) Yes, the IFI publishes its own costings of major new policy proposals.
c. (33) Yes, the IFI publishes its own costings of a limited number of new policy proposals.
d. (0) No, there is no IFI; or the IFI does not publish its own costings of new policy proposals.

**Sources:** The Public Financial Management and Accountability Act, 2011; 25:1-6 page 15-16 highlights the prebudget process and the expected schedule that should be adhered to. The entire legislative assembly is not involved in the pre-budget discussions, rather the Standing Specialized Committee on Economy, Development & Finance of the Assembly is consulted and provides recommendations.

**Comments:** Researcher: There are incidences reported in news about hearings that were undertaken by specialised committees with the main focus on particular government agencies overspending their budget line. This was captured by the media for a short time before being dismissed. This was reported on Monday, 11th August 2014. See link below [here](http://radiotamazuj.org/en/article/journals-blocked-covering-s-sudan-budget-report) Further proof of these deliberations is published in another news outlet on Wednesday, 23rd November 2016 during the presentation of the budget analysis that cited the committee of economy and finance recommending the government to shut down oil production based on the cost benefit analysis it had carried out. See link to this discussion, [here](http://www.eyeradio.org/oil-revenues-finance-committee-mps-prefer-shut/) These discussions do not specifically point to prebudget discussions but they do point to deliberations done by the standing specialised committees on matters of national concern that indicates opinions are sought, deliberations made and recommendations included.

**Answer:** d.

**Sources:** The Public Financial Management and Accountability Act, 2011, 25(6) cites that the executive budget proposal should be tabled not later than 15th May of every financial year. With the financial year commencing on 1st July to 30th June, this makes it less than three months.

**Comments:** Researcher: This practice has varied in the recent past and in reference to the three FY 2016/17; 2015/16 and 2014/15. The FY 2016/17 was just passed on 18th October 2016, six months from the time it was scheduled to be tabled. This can be attested by the national budget speech of FY 2016/17. In the FY 2015/16, the proposal was tabled on 29th June 2015, over approximately six weeks than what the law states. In the FY 2014/15, the proposal was tabled on the 25th June 2014, still later than the cited period within the law. This only suggests that the practice is different than what is stated by law. This however, can be argued as a result of the ongoing conflict that commenced in December 2013 till to date. However in FY 2013/14, the draft budget was tabled in parliament on September 2013. The FY 2012/13 was also tabled in June. We can therefore conclude that despite what the law suggests, the budget proposal has not been tabled on time. ### 109: When does the legislature approve the Executive's Budget Proposal?

- **a.** (100) The legislature approves the budget at least one month in advance of the start of the budget year.
- **b.** (67) The legislature approves the budget less than one month in advance of the start of the budget year, but at least by the start of the budget year.
- **c.** (33) The legislature approves the budget less than one month after the start of the budget year.
- **d.** (0) The legislature approves the budget more than one month after the start of the budget year, or does not approve the budget.
- **e.** Not applicable/other (please comment).

**Answer:** d.

**Sources:** In accordance with the Public Financial Management and Accountability Act, 2011: 26(2), the budget proposal should be passed by the legislative assembly within 45 days at the time of it being tabled not later than the 15th May of every financial year. Beyond this date, the president will use a decree to pass it on. Since the 2016/17 budget has not yet been passed using the FY 2015/16, the budget was passed on the 8th September. http://grss-mof.org/news/national-legislative-assembly-appro… (http://grss-mof.org/news/national-legislative-assembly-approves-national-government-budget-201516/)

**Comments:** Researcher: The legislative assembly does make its input and provides recommendations when the draft budget is tabled to them and depending on when it is tabled, it takes a number of hearings before it is passed. The respective news outlet Radio Tamazuj, Eye Radio and Sudan tribune point out to the fact that the legislative assembly makes inputs, provides recommendations and performs its oversight functions too. https://radiotamazuj.org/en/article/journalists-blocked-covering-s-sudan-budget-report https://radiotamazuj.org/en/article/national-legislative-assembly-begins-annual-budget-debate http://www.sudantribune.com/spip.php?article56322 (http://www.sudantribune.com/spip.php?article56322) http://www.eyeradio.org/oil-revenues-finance-committee-mps-prefer-shut/ However, the legal authority to amend is established in the PFM Act.

### 110: Does the legislature have the authority in law to amend the Executive's Budget Proposal?

- **a.** (100) Yes, the legislature has unlimited authority in law to amend the Executive’s Budget Proposal.
- **b.** (67) Yes, the legislature has authority in law to amend the Executive’s Budget Proposal, with some limitations.
- **c.** (33) Yes, the legislature has authority in law to amend the Executive’s Budget Proposal, but its authority is very limited.
- **d.** (0) No, the legislature does not have any authority in law to amend the Executive’s Budget Proposal.
- **e.** Not applicable/other (please comment).

**Answer:** a. (100)

**Sources:** The Public Financial Management and Accountability Act, 2011, 17(3,4) gives the Assembly broad amendment powers.

**Comments:** Researcher: Despite this clause, the practice suggests differently. The legislative assembly does practice its oversight role and grill the ministers over cases such as not adhering to the approved budget lines, over spending and in some cases reducing the budgets of other agencies. They have also recommended on stopping the production of oil but in the end that is where they have stopped. They have not changed the overall budget, reduced or increased on their own rather they have critiqued it and that is as far as they go. So it is fair to suggest that they have not gone against the executive’s proposal of approving or reducing the budget and the respective links justify so. http://www.sudantribune.com/spip.php?article56322 (http://www.sudantribune.com/spip.php?article56322) http://www.sudantribune.com/spip.php?article48103 http://www.eyeradio.org/oil-revenues-finance-committee-mps-prefer-shut/) However, the legal authority to amend is established in the PFM Act.
During the last budget approval process, did a specialized budget or finance committee in the legislature examine the Executive’s Budget Proposal?

a. (100) Yes, a specialized budget or finance committee had at least one month to examine the Executive’s Budget Proposal, and it published a report with findings and recommendations prior to the budget being adopted.
b. (67) Yes, a specialized budget or finance committee had less than one month to examine the Executive’s Budget Proposal, and it published a report with findings and recommendations prior to the budget being adopted.
c. (33) Yes, a specialized budget or finance committee examined the Executive’s Budget Proposal, but it did not publish a report with findings and recommendations prior to the budget being adopted.
d. (0) No, a specialized budget or finance committee did not examine the Executive’s Budget Proposal.
e. Not applicable/other (please comment).

During the most recent budget approval process, did the legislature use its authority in law to amend the Executive’s Budget Proposal?

a. (100) Yes, the legislature used its authority in law to amend the Executive’s Budget Proposal, and (at least some of) its amendments were adopted.
b. (67) Yes, the legislature used its authority in law to propose amendments to the Executive’s Budget Proposal, but no amendments were adopted.
c. (33) No, while the legislature has the authority in law to propose amendments to the Executive’s Budget Proposal, no amendments were offered.
d. (0) No, the legislature does not have any such authority.
e. Not applicable/other (please comment).

Answer: c. (33)

Sources: There are standing specialised committees within the assembly who are tasked with the responsibility of making sector-specific changes and this is presented to them by the ministry to whom they revert back to in case of further recommendations made. A case in point is the recommendation made by the committee of economy and finance that proposed shutting of oil production (see link: http://www.eyeradio.org/oil-revenues-finance-committee-mps-p… (http://www.eyeradio.org/oil-revenues-finance-committee-mps-prefer-shut/) despite their recommendation not been followed. It thus shows that specialised committees are consulted and they do make contributions towards the proposal but within the respective specialised committee platforms. An additional link further points to the role of the specialised committees in making necessary recommendations and input to the budget proposal.(https://radiotamazuj.org/en/article/south-sudan-budgets-bills-20162017). We however cannot verify the extent of their contribution and subsequent incorporation other than knowing they made a contribution which the respective links suggest so.

Comments: Researcher: Response to your query: I spoke to a finance personnel albeit at state level conversant with this process. He mentioned that normally the amendments made to the budget proposal are stipulated in a circular and shared. He promised to get a copy of such a letter to me in the near future. I will follow on other leads too. I also spoke shortly after to the staff to one of the committees in the national legislative assembly, he mentioned such changes do occur however details of such are not accessible to the public and restricted for government use.
During the last approval process, did legislative committees, responsible for particular sectors (e.g., health, education, defense, etc.), examine spending in the Executive’s Budget Proposal related to the sector for which they are responsible?

a. (100) Yes, sector committees had at least one month to examine the Executive’s Budget Proposal, and they published reports with findings and recommendations prior to the budget being adopted.

b. (67) Yes, sector committees had less than one month to examine the Executive’s Budget Proposal, and they published reports with findings and recommendations prior to the budget being adopted.

c. (33) Yes, sector committees examined the Executive’s Budget Proposal, but they did not publish reports with findings and recommendations prior to the budget being adopted.

d. (0) No, sector committees did not examine the Executive’s Budget Proposal.

e. Not applicable/other (please comment).

Answer: c. (33)

Sources: Yes the specific specialised committees have examined the budget proposals and raised concerns regarding the over expenditure of specific agencies while reducing from others. This is however only indicated in the newspaper websites, but does not give us further detail about the publishing of the report and what each specific committee examined. The links below illustrate the role different specialised committees play:

Comments: Researcher: I spoke to the staff in one of the committee who prefers to speak on condition of anonymity. He said the South Sudan Legislative Assembly has eighteen committees that include; Education, Research, Science and Technology; Health/HIV and AIDS; Development, economy and finance; Public Accounts; Physical Infrastructure; Gender Child; Social Welfare, Religious Affairs; Youth and Sports; Legislation and Justice; Land, Agriculture, Animal Resources and Environment; Member’s Affairs; Energy; Mining, Commerce and Industry; Constituency Fund Committee; Public Service and Labour; Water Resources and Irrigation and Foreign Affairs and International Co-operation; Human Rights and Humanitarian Affairs; Defense, Security and Public Order; Information, Telecommunications and Culture and Peace and Reconciliation. Each committee has a chairperson and his deputy and at least sixteen members. No minister is a member of any standing specialised committee of the assembly but it will reflect the political representation in the assembly. Chairperson and their deputies are nominated by political parties in the assembly taking into consideration numerical representation of the party, their competence, gender and geographical balance. The speaker or his deputy will approve it.

The general functions of these committees include; making recommendations on bills tabled before the house related to their sector referred to them; initiate any bill within their respective areas of competence; assess and evaluate activities and performance of the executive and other government bodies; carry out relevant research in their respective fields and report to the house on their activities at least once a session. When the minister of finance tables the budget proposal in the first reading of a bill, it is then referred to the economy, development and finance committee by the speaker to scrutinise through the national budget bill. The national legislative Assembly conduct of business regulations 2011, Chapter XX Article 102 (3) page 79 states that, “the committee shall not delay the bill that has been referred to it, but shall make sure that it reports its decisions to the house within a maximum period of two weeks or shall be determined by the house”. The staff at legislative assembly however says in principle it should take 45 days between the time the minister of finance tables the proposal till it is passed by the house. However in recent times, it has even surpassed such as for the FY 2016/17. So the amount of days a committee is not strictly fixed at two weeks but dependent on so many factors though it the ideal situation is it should take within 45 days in which they will review phases of second reading, third and till it goes through the final reading in cases where there is need for further amendment.
114: In the past 12 months, did a committee of the legislature examine in-year implementation of the Enacted Budget during the relevant budget execution period?

a. (100) Yes, a committee examined in-year implementation on at least three occasions during a fiscal year, and it published reports with findings and recommendations.
b. (67) Yes, a committee examined in-year implementation on one or more occasion (but less than three times), and it published a report with findings and recommendations.
c. (33) Yes, a committee examined in-year implementation, but it did not publish any report with findings and recommendations.
d. (0) No, a committee did not examine in-year implementation.
e. Not applicable/other (please comment).

Answer: c. (33)

Sources: Yes the committees did examine in year implementation of the enacted budget FY 2015/16 and this is evident through the annual reports presented (see attached). It is also stipulated in Public Financial Management and Accountability Act, 2011; 49(2-3) that mentions different agencies are required to submit quarterly and annual reports during the fiscal year.

Comments: Researcher: It is also indicated in the first pages of the Full year Fiscal annual report that are presented to the legislative assembly by the ministry of finance as meeting the requirements of reporting on the execution of the budget. In this regard, we can infer that they examine in year implementations of the enacted budget. Response to your query: The ministry of finance and planning produced the report to the national assembly. It is a quarterly report and being quarterly it was produced in October 2016 for FY 2015/16. From my discussions with the staff at the national legislative assembly i can conclude that reports from the finance ministry are often directed first to the economic and finance committee.

115: Does the executive seek approval from the legislature prior to shifting funds between administrative units that receive explicit funding in the Enacted Budget, and is it legally required to do so?

a. (100) The executive is required by law or regulation to obtain approval from the legislature prior to shifting funds between administrative units, and it does so in practice.
b. (67) The executive obtains approval from the legislature prior to shifting funds between administrative units, but is not required to do so by law or regulation.

Comments: Researcher: There are two instances here; on the one side, when there is need for supplementary budget the government duly obliges and tables it to the legislative assembly to examine and then pass it. In this case, they follow the law. In the second instance, you have cases of budgets being passed and the government ministries either over spending or shifting funds from different budget lines without the express notice of the legislative assembly and only brought to the assembly's attention during the presentation of quarterly reports. In this case they do not obtain legislative approval despite the law stipulating so. In one of the newspaper, the former ministry of finance cited overspending due to intimidation from government officials. This points to the practise as not conforming to the law. See the links below: http://www.sudantribune.com/spip.php?article48103 http://www.theniles.org/en/articles/politics/20010 http://www.sudantribune.com/spip.php?article56322 (http://www.sudantribune.com/spip.php?article56322)

Answer: a. (100)

Sources: The Public Financial Management and Accountability Act, 2011 under the supplementary appropriation bill chapter IV; 18(1) stipulates the strict adherence required in observing the budget line of the approved budget and in the case of any changes needed, the assembly is expected to approve the supplementary appropriation bill. Clause 4 of the same supplementary appropriation bill, highlights the sources of financing for the supplementary budget and reductions in a budget line is one such source that has been stated. In this regard the law does cater for that. However, there has never been a case where the government has actually sought to reduce its budget due to the deficit in its budget. Rather, they have gone on to supplement the deficit through loans. A case in point is the revised budget of FY 2013/14 when it was tabled again to reflect the government
changes with reductions and increments made from one budget line to another. [http://www.sudantribune.com/spip.php?article48103](http://www.sudantribune.com/spip.php?article48103)

I, however, was able to consult with a staff to this committee who mentioned that the auditor general has often stated that the reports are ready. He, however, did not have access to it. He also stated that the last presentation ever done on an audit report was in 2012 for the 2008 annual audit. The most recent one after that was at their request, asked the audit chambers to do an audit on the Bank of South Sudan which was done and the findings were confined to their committee. He mentioned that they had made contact with civil society and press to attend the public hearing but they were advised by colleagues higher up in the hierarchy to not involve the press nor public in this except their own committee. Answer: b. (67)

Sources: The audit chambers do have the discretion and are permitted by law to undertake audits within the areas it is specified to, “audit and supervise Government institutions and agencies including ministries, commissions, legislative assemblies, Bank of South Sudan and the universities. The mandate covers all of South Sudan both at national government, state, and county level.” See source http://www.auditchamber-ss.org/functions.html However, despite the law, the last time a government report was published was for the FY 2007/8 and discussed in 2012. Subsequent audit reports that have been carried out by the chambers has been presented to the assembly and the public accounts committee but not published and therefore not accessible to the public. It (http://public.It), therefore shows that there are limitations in regards to the law not being adhered to in practice. See link for functions and refer to previous links shared for the limitations. http://www.auditchamber-ss.org/functions.html

IBP comment: Clarification: the government initially agreed to review the draft Open Budget Survey questionnaire, but did not provide any comments on the Survey questions. The survey tool used, however, did not allow IBP to leave the government responses blank. Therefore, the “I am not qualified to judge this indicator” option had to be selected. The appropriate answer is “NOT APPLICABLE”, because the government did not provide any comments to any of the questions in the Open Budget Survey.

123: Are the audit processes of the Supreme Audit Institution (SAI) reviewed by an independent agency?

a. (100) Yes, an independent agency conducts and publishes a review of the audit processes of the SAI on an annual basis.
b. (67) Yes, an independent agency conducts and publishes a review of the audit processes of the SAI at least once in the past five years, but not annually.
c. (33) No, but a unit within the SAI conducts a review of the audit processes of the SAI on a regular basis.
d. (0) No, the audit processes of the SAI are reviewed neither by an independent agency nor by a unit within the SAI.
e. Not applicable/other (please comment).

Answer: b. (67)

Sources: There has not been any independent review of the audit processes. There has been no mention of it in the audit chambers website about any review being done. It however cites that there has not been any performance review of its audit process which goes to show that the independent
review has not taken place. See link below: http://www.auditchamber-ss.org/reports-3-performance.html

124: In the past 12 months, how frequently did the head or a senior staff member of the Supreme Audit Institution (SAI) take part and testify in hearings of a committee of the legislature?

a. (100) Frequently (i.e., five times or more).
b. (67) Sometimes (i.e., three times or more, but less than five times).
c. (33) Rarely (i.e., once or twice).
d. (0) Never.
e. Not applicable/other (please comment).

Answer: d.

Sources: The news outlet indicates the last time the auditor general presented the audit report was back in 2012 to the president and assembly. See link, http://www.auditchamber-ss.org/report-2012-06-27-ag-report-nla.html Even if there are cases that he has taken part or testified in the assembly, there is no account of that.

125: Does the executive use participation mechanisms through which the public can provide input during the formulation of the annual budget (prior to the budget being tabled in parliament)?

a. (100) Yes, the executive uses open participation mechanisms through which members of the public and government officials exchange views on the budget.
b. (67) Yes, the executive uses open participation mechanisms through which members of the public provide their inputs on the budget.
c. (33) Yes, the executive uses participation mechanisms during the budget formulation phase, but either these mechanisms capture only some ad-hoc views, or the executive invites specific individuals or groups for budget discussions (participation is not, in practice, open to everyone).
d. (0) The requirements for a “c” response or above are not met.
e. Not applicable (please comment).

Answer: d.

Comments: Researcher: There is no evidence that the executive has any centrally planned mechanisms to involve the public in the budget formulation processes. The sources cited above describe a situation where the space for public engagement in any formal processes involving the budget is virtually nonexistent.

**Answer:** d.

Comments: Researcher: There is no evidence that the executive engages directly with citizens on any of the key topics highlighted above. However, on a broader level, the Office of the President has been conducting the Governors' Forum since 2005. The forum brought together the 10 state governors, members of the legislatures, key ministers and development partners. Main discussion points included on policies related to political, fiscal and administrative governance issues. Over 6 such forums were conducted since 2005 and the last was conducted in 2014. Although the public were not directly involved, the press coverage provided the public an avenue to follow government's progress in the implementation of the development plan.

Comments: Researcher: There is no mechanism established by the executive to encourage public participation. INGOs such as Oxfam have been supporting civil society organisations to take up the role of monitoring of government functions. Over the past few years, in particular, CEPO has tried to undertake budget monitoring however the lack of initiative from the executive to encourage public participation and with the blocking of press from covering the 2016 budget reading is indicative of the blatant disregard for the public’s right to access information regarding any of the budget processes.

When the executive engages with the public, does it provide comprehensive prior information on the process of the engagement, so that the public can participate in an informed manner?

Comprehensive information must include at least three of the following elements:

1. Purpose
2. Scope
3. Constraints
4. Intended outcomes
5. Process and timeline
a. (100) Comprehensive information is provided in a timely manner prior to citizens engagement in both budget formulation and implementation phases.

b. (67) Comprehensive information is provided in a timely manner prior to citizens engagement only prior to one of the two phases (formulation OR implementation).

c. (33) Information is provided in a timely manner in both or one of the two phases, but it is not comprehensive.

d. (0) The requirements for a “c” response or above are not met.

e. Not applicable (Please comment).

Answer: d.

Comments: Researcher: Not applicable given the circumstances. Over the past two years, the space for public engagement has only become worse. Prior to this, there was no advance information shared for instance before the Governor’s Forum except for the theme of the forum. Secondly, there were no mechanisms to capture citizen’s opinions on the proceedings.
