**Drawing on internationally accepted criteria developed by multilateral organizations, the Open Budget Survey uses 109 equally weighted indicators to measure budget transparency. These indicators assess whether the central government makes eight key budget documents available to the public online in a timely manner and whether these documents present budget information in a comprehensive and useful way.**

Each country receives a composite score (out of 100) that determines its ranking on the Open Budget Index – the world’s only independent and comparative measure of budget transparency.

**How has the OBI score for Zambia changed over time?**

**How comprehensive and useful is the information provided in the key budget documents that Zambia publishes?**

- **Pre-Budget Statement**: Not produced
- **Executive’s Budget Proposal**: Not published online
- **Enacted Budget**: Produced for internal use only
- **Citizens Budget**: Not published online
- **In-Year Reports**: Published late
- **Mid-Year Review**: Produced for internal use only
- **Year-End Report**: Produced for internal use only
- **Audit Report**: Published late

Zambia’s score of 8 out of 100 is substantially lower than the global average score of 42.
Zambia’s score of 8 on the 2017 Open Budget Index is substantially lower than its score in 2015.

The country’s score is in part affected by the change in definition of “publicly available” which from OBS 2017 only recognizes those documents that are published online on an official government website as available to the public. Online availability is now considered a basic standard for the publication of government information. Because of this change, Zambia no longer receives credit for the Executive’s Budget Proposal, which was not available in its entirety on the Ministry of Finance’s website. While the Executive Budget Proposal’s estimates (Yellow Book) did have a link posted on the Ministry of Finance’s website, this link did not function during the research period, and so the file was not accessible. Hardcopies were available.

Moreover, Zambia has been inconsistent in which documents are made publicly available in any given year.

Since 2015, Zambia has increased the availability of budget information by:
- Publishing the In-Year Reports online.

However, Zambia has decreased the availability of budget information by:
- Producing the Year-End Report for internal use only.
- Not producing the Pre-Budget Statement.

Moreover, Zambia has failed to make progress in the following ways:
- Producing a Mid-Year Review but failing to make it available to the public in a timely manner.

Zambia’s score of 15 out of 100 indicates that it provides few opportunities for the public to engage in the budget process. This is higher than the global average score of 12.

To what extent do different institutions in Zambia provide opportunities for public participation?

Transparency alone is insufficient for improving governance. Public participation in budgeting is vital to realize the positive outcomes associated with greater budget transparency.

To measure public participation, the Open Budget Survey assesses the degree to which the government provides opportunities for the public to engage in budget processes. Such opportunities should be provided throughout the budget cycle by the executive, the legislature, and the supreme audit institution.

The questions assessing participation in the Open Budget Survey 2017 were revised to align them with the Global Initiative for Fiscal Transparency’s new principles on public participation, which now serve as the basis for widely accepted norms on public participation in national budget processes. Therefore, data on the extent of public participation in budgeting in the Open Budget Survey 2017 cannot be compared directly to data from earlier editions.
The Open Budget Survey examines the role that legislatures, supreme audit institutions, and independent fiscal institutions play in the budget process and the extent to which they are able to provide effective oversight of the budget. These institutions play a critical role — often enshrined in national constitutions or laws — in planning budgets and overseeing their implementation.

These indicators were revised to better assess the role of formal oversight institutions in ensuring integrity and accountability in the use of public resources. Therefore, data on the role and effectiveness of oversight institutions in the Open Budget Survey 2017 should not be compared directly to data from earlier editions.

To what extent does the legislature in Zambia provide budget oversight?

The legislature provides weak oversight during the budget cycle. This score reflects that the legislature provides weak oversight during the planning stage of the budget cycle and limited oversight during the implementation stage of the budget cycle.

Oversight by an Independent Fiscal Institution

Zambia established an independent fiscal institution (IFI), the Parliamentary Budget Office, after the close of the research period of the Open Budget Survey 2017.

While IFIs are not yet widespread globally, they are increasingly recognized as an important source of independent, nonpartisan information. IFIs take a variety of different institutional forms. Common examples include parliamentary budget offices and fiscal councils. For more information, see Lisa von Trapp, Ian Lienert, and Joachim Wehner, “Principles for Independent Fiscal Institutions and Case Studies,” OECD Journal on Budgeting, March 2016 (special issue), pp. 9-24.

Recommendations

For more detailed information on the survey findings for Zambia, please see the Open Budget Survey Data Explorer at survey.internationalbudget.org.

How can Zambia improve transparency?

Zambia should prioritize the following actions to improve budget transparency:

- Publish an Executive’s Budget Proposal (including both the Budget Speech and Yellow Book) in a timely manner on the Ministry of Finance’s website, and ensure that the links function properly. The OBS 2017 examined the Executive’s Budget Proposal for FY 2017. While the Yellow Book did have a link posted on the Ministry of Finance’s website, this link did not function during the research period, and so the file was not accessible.
- Produce and publish a Pre-Budget Statement online in a timely manner.
- Ensure that future versions of the Citizens Budget, the Mid-Year Review, and the Year-End Report are published online in a timely manner.
How can Zambia improve participation?
Zambia should prioritize the following actions to improve public participation in its budget process:

- Pilot mechanisms for members of the public and executive branch officials to exchange views on national budget matters during both the formulation of the national budget and the monitoring of its implementation. These mechanisms could build on innovations, such as participatory budgeting and social audits. For examples of such mechanisms, see www.fiscaltransparency.net/mechanisms/.
- Hold legislative hearings on the formulation of the annual budget, during which any members of the public or civil society organizations can testify.
- Establish formal mechanisms for the public to assist the supreme audit institution in formulating its audit program and to participate in relevant audit investigations (for example, via social audits or value-for-money surveys).

How can Zambia improve oversight?
Zambia should prioritize the following actions to make budget oversight more effective:

- Ensure the legislature holds a debate on budget policy prior to the tabling of the Executive's Budget Proposal and approves recommendations for the upcoming budget.
- Ensure a legislative committee examines and publishes reports on in-year budget implementation online.
- Ensure that the newly established independent fiscal institution's funding is adequate and not reliant on international donors and publish its reports and analyses online.

METHODOLOGY

The Open Budget Survey uses internationally accepted criteria developed by multilateral organizations from sources such as the International Monetary Fund (IMF), the Organisation for Economic Co-operation and Development (OECD), the International Organisation of Supreme Audit Institutions (INTOSAI) and the Global Initiative for Fiscal Transparency (GIFT).

It is a fact-based research instrument that assesses what occurs in practice through readily observable phenomena. The entire research process took approximately 18 months between August 2016 and January 2018 and involved about 300 experts in 115 countries. The Open Budget Survey 2017 assesses only events, activities, or developments that occurred up to 31 December 2016. The survey was revised somewhat from the 2015 version to reflect evolving methods for disseminating budget information and to strengthen individual questions on public participation and budget oversight. A discussion of these changes can be found in the Open Budget Survey Global Report (see link below).

Survey responses are typically supported by citations and comments. This may include a reference to a public document, an official statement by the government, or comments from a face-to-face interview with a government official or other knowledgeable parties.
